

## Task 1: Multiple Graphs

**Subject:** The charts below give information on the ages of the populations of Yemen and Italy in 2000 and projections for 2050. Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

### Question

The charts below give information on the ages of the populations of Yemen and Italy in 2000 and projections for 2050.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

## Answer #1

### Response:

The graphs show data about the number of people who lived in two nations, with predictions for 2050 regarding their ages.

Overall, it is predicted that the number of children is forecasted to decrease in both nations, while the population of elderly people is expected to increase. Meanwhile, the number of people between 15 and 59 is anticipated to decrease noticeably, while this is set to increase marginally in Yemen. In 2000, the number of children in Yemen comprised half of the total population; however, it is expected that it will witness a significant decline to 37 percent. In contrast, the number of elderly people was less than one-twentieth in 2000, and it is forecasted that it will increase gradually by 2050. Meanwhile, the population of people between 15 and 59 is projected to grow moderately to just under 60%.

Turning to Italy, the population of children there consisted of just under 15%, and it is forecasted to fall modestly to just over one-tenth. For elderly persons, it was around a quarter of all people in 2000, and it is projected that figure will encounter a noticeable rise in 2050. It is evident from the graph that the number of people who are between 15 and 59 is more than 60%, and it is anticipated that this will experience a moderate increase by 15%.

### Scores:

Overall Band Score: 9

Task Response: 9 - Excellent response to the task. All key features are accurately described.

Coherence & Cohesion: 9 - The report is exceptionally well-organized and easy to follow. The flow of information is natural and logical.

Lexical Resource: 8.5 - A wide range of sophisticated vocabulary is used accurately and appropriately. The language is precise and effective.

Grammatical Range & Accuracy: 9 - The grammar is flawless. A wide range of grammatical structures is used with complete accuracy and fluency.

## Answer #2

### Response:
