

Task 1: Line Graph

Subject: The graph below shows the internet users as percentage of population in USA, Mexico and Canada

CS

IELTS writing task 1

The graph below shows the internet users as percentage of population in USA, Mexico and Canada.

Model Answer #1

Response:

The line graph delineates the proportion of internet users as a percentage of the population in the USA, Canada, and Mexico from 1999 to 2009.

In summary, all three countries exhibited a notable increase in internet usage over the specified decade, with Canada demonstrating the most pronounced growth, while Mexico consistently maintained the lowest figures.

In 1999, the United States recorded approximately 20% of its population as internet users, while Canada and Mexico had even lower percentages, standing at around 10% and 5%, respectively. Throughout the early years of the decade, a marked upward trajectory was observed across all nations. Notably, Canada's growth in internet users accelerated, allowing it to surpass the United States in 2003, a significant milestone signaling a shift in digital engagement among these countries.

By the year 2009, the percentage of internet users in Canada reached between 70% and 80%, representing the highest penetration rate among the three nations. In contrast, the United States saw its figure rise to just below 80%, while Mexico's percentage notably expanded to approximately 30%. Despite the upward trend, Mexico's internet adoption rate remained significantly lower than that of its North American counterparts throughout the entire period, highlighting a disparity in technological access and utilization.

Evaluation:

Overall Band Score: 9

Task Response (9): Excellent response to the task. All key features are accurately described and analyzed.

Coherence & Cohesion (9): The report is exceptionally well-organized and easy to follow. The flow of information is natural and logical.

Lexical Resource (8.5): A wide range of sophisticated vocabulary is used accurately and appropriately. The language is precise and effective.

Grammatical Range & Accuracy (9): The grammar is flawless. A wide range of grammatical structures is used with complete accuracy and fluency.

Model Answer #2

Response:

– Task 1 report ■

The given line graph provides information on the number of internet users in three North American countries (the USA, Mexico, and Canada) over a decade, from 1999 to 2009.

Overall, what stands out from the graph is that the number of internet users saw a significant increase in all three countries, with Canada emerging as the dominant country by the end of the period.

From 1999 to 2001, the trends for both the USA and Canada followed a similar pattern, reaching percentages of 40% and 30%, respectively, compared to Mexico's 10%. From 2001 to 2005, internet usage in Canada experienced rapid growth, surpassing the USA in 2003 and reaching approximately 80% by 2005. During the same period, the USA showed a steady increase, climbing to around 70%. In contrast, Mexico's growth remained modest, with the percentage of users rising to about 20%.

Between 2005 and 2009, Canada continued to dominate, achieving nearly 100% internet penetration by the end of the period. The USA also maintained consistent growth, ending at around 80%. Meanwhile, Mexico saw a gradual increase in internet users, reaching approximately 40% in 2009, the lowest among the three nations.

Evaluation:

Overall Band Score: 9

Task Response (9): Excellent overview of the main trends. All key features are accurately described.

Coherence & Cohesion (9): The report is exceptionally well-structured and easy to follow. The flow of information is natural and logical.

Lexical Resource (9): A wide range of sophisticated vocabulary is used accurately and appropriately. The language is precise and effective.

Grammatical Range & Accuracy (9): The grammar is flawless. A wide range of grammatical structures is used with complete accuracy and fluency.
