

Task 1: Map

Subject: The plan below show a school in 1985 and the school now. Summarize the information by selecting and reporting the main features, and make comparisons where relevant.

School in 1985
(School population: 1500 students)

School now
(School population: 2300 students)

Model Answer #1

Response:

The maps compare the layout of a school in 1985 with its current configuration, highlighting significant changes over time.

Overall, the school has expanded considerably, primarily due to a substantial increase in student enrollment. This growth has resulted in various modifications to the school grounds, creating a more developed and functional space.

In terms of enrollment, the number of students has risen from 1,500 in 1985 to approximately 2,300 today, reflecting a 33% increase. On the 1985 map, the largest portion of the grounds was occupied by sports fields in the south-east. However, this area has since been significantly reduced and replaced by a fitness center and a swimming pool. In the northern part of the campus, two parking lots were initially present—one larger lot and a smaller one beneath it. The larger lot has been reshaped into a more rounded design, while the smaller parking lot has been removed entirely.

In the center of the map, two school buildings were initially separated by a road, but these have since been expanded to include three classrooms. To the west, the office building has remained unchanged, while directly below it, the library has been renamed the Learning Resource Center. This updated facility now also houses a computer club. Additionally, trees, which were once located in the center of the grounds, have been retained as part of the landscaping.

In summary, the school's layout has evolved significantly, with key developments such as the expansion of buildings, the addition of new facilities, and the repurposing of certain areas to meet the needs of a growing student population.

Evaluation:

Overall Band Score: 9

Task Response (9): The report effectively addresses all aspects of the task and provides a comprehensive overview of the changes in the school layout. The content is well-organized and covers all key features.

Coherence & Cohesion (9): The report demonstrates excellent coherence and cohesion. The information flows smoothly and logically, with clear transitions between paragraphs. The overall structure is well-managed, making it easy to follow the changes described.

Lexical Resource (9): The report exhibits a wide range of vocabulary used accurately and appropriately. The choice of words effectively conveys the changes in the school layout, demonstrating sophisticated control of lexical features.

Grammatical Range & Accuracy (9): The report demonstrates excellent grammatical range and accuracy. The sentences are well-structured, and there are no noticeable grammatical errors. The punctuation is also used correctly throughout the report.

Model Answer #2

Response:

The given map illustrates the changes to a school that have been made from 1985 to the present time.

Generally, it can be seen that some additional facilities, like a pool and a fitness center, have been added to the school, as well as more classrooms, because of more students compared to the past.

In spite of the fact that the mentioned school had a large playing field in 1985, this area has become smaller because a pool and fitness center have been placed in that area. Likewise, nowadays, this place has one more classroom, which has been added to the right side of the map, and also, in the present time, classroom blocks have one more story than in 1985.

Similarly, the library, which was placed on the left side of the school's map in 1985, has now been turned into a learning resources center and computer room. However, other parts of the school, including the car park, office, exit, and entrance points, remained unchanged during the mentioned time.

Evaluation:

Overall Band Score: 9

Task Response (9): Excellent overview of the key changes shown in the maps. All main features are accurately described and compared.

Coherence & Cohesion (9): The report flows smoothly and logically. Paragraphing is well-managed, and the connections between ideas are clear and easy to follow.

Lexical Resource (9): A wide range of sophisticated vocabulary is used accurately and appropriately. The language is precise and natural.

Grammatical Range & Accuracy (9): The grammar is accurate and varied throughout. A wide range of structures is used with complete control.

Model Answer #3

Response:

The two maps illustrate the significant transformation made to a school between 1985 and the present, reflecting a notable expansion in infrastructural amenities to accommodate a growing student population.

Overall, the school has retained its location next to the main road, with an entrance, an exit, and a car park, but its layout has undergone considerable changes. While some structures, such as the school office, remain unchanged, others have been replaced, expanded, or newly added to meet the needs of an increased population from 1,500 to 2,300 attendants.

One striking change is the redesign of the car park, which has shifted from a square shape surrounded by a path to a semi-circular layout. Additionally, a smaller car park that existed in 1985 has been removed, establishing spacious plots for other facilities. On the left side, the former library was replaced by a modern learning resources centre with a computer room inside. Similarly, the small interconnection road between the car park and the playing fields was demolished, with the fields themselves reduced in size.

Taking a glance at the central parts of the maps, the classroom blocks have also been significantly upgraded. While the original two-storey building has been expanded into a three-storey one, an additional classroom block was constructed to the right. Furthermore, the area previously occupied by the playing fields now prioritises a swimming pool and a fitness centre, which have consolidated a recreational dimension to the school's infrastructure.

Evaluation:

Overall Band Score: 9

Task Response (9): Excellent response to the task. All key features are accurately described and compared.

Coherence & Cohesion (9): The report is exceptionally well-organized and easy to follow. The flow of information is natural and logical.

Lexical Resource (9): A wide range of sophisticated vocabulary is used accurately and appropriately. The language is precise and effective.

Grammatical Range & Accuracy (8): Minor grammatical inaccuracies are present, but they do not detract significantly from the overall quality of the writing.

Model Answer #4

Response:

The images below illustrate a school site and its number of students in 1985 and now.

Overall, there have been significant changes to the area, with most of them being additions and removals of some facilities, allowing for a higher capacity of students.

The car park at the north side of the school has been reshaped from a rectangular shape into an oval one. Moreover, the road in the middle, connecting the parking area to the playing fields on the south side, has been removed. On the left part of the site, the office remained unaffected, while the library has been replaced with a learning resources center, including a computer room. Regarding the right section of the school, there have been additional classrooms and another story added to the classroom block.

On the south area of the school zone, the playing fields have been shrunk to make space for new facilities. A new pool and fitness center have been built on the left area of the field, and classrooms, which were on the left side of the middle road in 1985, have been relocated to be next to the two new buildings.

Evaluation:

Overall Band Score: 9

Task Response (9): Excellent response to the task. All key features are accurately described and compared.

Coherence & Cohesion (9): The report is exceptionally well-organized and easy to follow. The use of cohesive devices is seamless and sophisticated.

Lexical Resource (9): A wide range of precise and sophisticated vocabulary is used effectively throughout the report.

Grammatical Range & Accuracy (9): The grammar is impeccable. A wide range of grammatical structures is used accurately and appropriately.

Model Answer #5

Response:

The diagrams illustrate the changes that have taken place in a school between 1985 and the present. Overall, the school has undergone significant changes, the most important of which are the addition and development of facilities to cater to the educational and physical activities of an increased number of students.

On the one hand, In 1985, the north of the school campus featured a rectangular car park with a road surrounding it, connecting an entrance and an exit. This car park has since been changed to a semicircular shape along with the road, while another small car park in the southwest has been removed. Additionally, the driveway leading southward from the road to the large playing fields has also been demolished, making space for trees.

On the other hand, In 1985, the south side of the school premises was primarily occupied by playing fields. These fields have since been halved to make way for the construction of a new physical complex, which includes a pool and a fitness center to the west of the playing fields. Additionally, a library located to the west of the campus has been upgraded to a learning resource center, which now includes a new computer room. To the south of this center, an expanded building of classrooms has been constructed, which was previously located to the east of the former library.

Evaluation:

Overall Band Score: 9

Task Response (9): The report provides a comprehensive and accurate summary of the key changes in the school layout, effectively highlighting the main features and comparisons.

Coherence & Cohesion (9): The report is well-structured and logically organized, with clear transitions between paragraphs and ideas. The use of cohesive devices is seamless and enhances the flow of information.

Lexical Resource (9): The report demonstrates a wide range of vocabulary, using precise and sophisticated language to describe the changes in the school layout. The choice of words is appropriate and effective.

Grammatical Range & Accuracy (9): The report exhibits a high level of grammatical accuracy and fluency. The use of complex sentence structures and varied grammatical forms is accurate and contributes to the overall clarity and sophistication of the writing.
