

# Task 1: Map

**Subject:** The plans below show the site of an airport now and how it will look after redevelopment next year. Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

## WRITING

### WRITING TASK 1

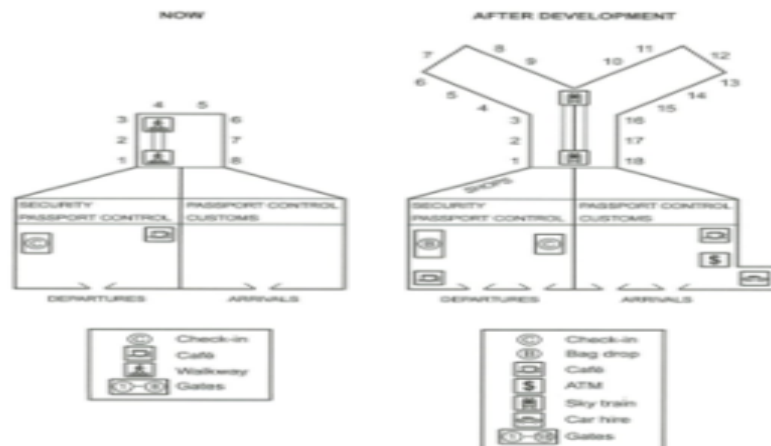

You should spend about 20 minutes on this task.

*The plans below show the site of an airport now and how it will look after redevelopment next year.*

*Summarise the information by selecting and reporting the main features, and make comparisons where relevant.*

Write at least 150 words.

### SOUTHWEST AIRPORT

## Model Answer #1

### Response:

The plans illustrate the current layout of Southwest Airport and the proposed redevelopment scheduled for next year. Overall, the airport will undergo significant expansion, introducing new facilities and doubling the number of gates to enhance passenger convenience and capacity.

Currently, the airport features a modest setup with a central check-in area, security, passport control, and eight gates accessible by a walkway. There is also a café in the departures section and a single arrivals hall.

After redevelopment, the airport will expand its gate area from eight to eighteen, which will be connected by a new sky train instead of the current walkway. The check-in area will be relocated to the left side of the departures hall, while a new bag drop facility will be added on the right. Additionally, more passenger amenities, including shops, an ATM, and a car hire service, will be introduced in the arrivals hall. A second café will also be added near the expanded gates.

In summary, the redevelopment will transform the airport by expanding the gates, improving connectivity, and adding various modern facilities for passenger convenience.

### Evaluation:

#### Overall Band Score: 9

**Task Response (9):** Excellent summary of the main features and comparisons. All key information is accurately reported.

**Coherence & Cohesion (9):** The report is exceptionally well-organized and easy to follow. The flow of information is natural and logical.

**Lexical Resource (9):** A wide range of sophisticated vocabulary is used accurately and appropriately. The language is precise and effective.

**Grammatical Range & Accuracy (9):** The grammar is flawless. A wide range of grammatical structures is used with complete accuracy and fluency.

## Model Answer #2

### Response:

The plans illustrate the current layout of Southwest Airport and the proposed redevelopment scheduled for next year. Overall, the airport will undergo significant expansion, introducing new facilities and doubling the number of gates to enhance passenger convenience and capacity.

Currently, the airport features a modest setup with a central check-in area, security, passport control, and eight gates accessible by a walkway. There is also a café in the departures section and a single arrivals hall.

After redevelopment, the airport will expand its gate area from eight to eighteen, which will be connected by a new sky train instead of the current walkway. The check-in area will be relocated to the left side of the departures hall, while a new bag drop facility will be added on the right. Additionally, more passenger amenities, including shops, an ATM, and a car hire service, will be introduced in the arrivals hall. A second café will also be added near the expanded gates.

In summary, the redevelopment will transform the airport by expanding the gates, improving connectivity, and adding various modern facilities for passenger convenience.

### Evaluation:

#### Overall Band Score: 9

**Task Response (9):** Excellent summary of the main features and comparisons. All key information is accurately reported.

**Coherence & Cohesion (9):** The report is exceptionally well-organized and easy to follow. The flow of information is natural and logical.

**Lexical Resource (9):** A wide range of sophisticated vocabulary is used accurately and appropriately. The language is precise and effective.

**Grammatical Range & Accuracy (9):** The grammar is flawless. A wide range of grammatical structures is used with complete accuracy and fluency.

## Model Answer #3

### Response:

The provided plans delineate the current configuration of Southwest Airport and the proposed enhancements scheduled for implementation in the upcoming year.

Significant modifications are slated to occur across the airport, with notable improvements in both accessibility and passenger facilities, resulting in a more efficient and accommodating layout.

Presently, the airport features six distinct areas, namely check-in, café, gates, passport control, security control, and transport control. Access to the airport is unidirectional; passengers enter through the departures corridor, which houses both the check-in area and a café, while the arrivals side remains devoid of any amenities. Following security and passport checks, departing travelers proceed along a walkway to the gates, whereas incoming passengers exit via passport control areas. This layout potentially limits the overall passenger experience, as indicated by the absence of facilities on the arrivals side.

In the proposed redevelopment, the airport's structure will expand to encompass 18 distinct areas, effectively increasing capacity and functionality. Importantly, two access points will be established—one for departures and another for arrivals. New amenities will be introduced, including a baggage drop-off for departing passengers, as well as a café, ATM, and car hire facilities designated for arrivals. The future layout, configured in a Y-shape, will feature additional gates, significantly enhancing operational efficiency on peak travel days. Furthermore, the introduction of a sky-train will facilitate expedited transportation for passengers, thereby improving overall accessibility within the airport.

### Evaluation:

#### Overall Band Score: 9

**Task Response (9):** The report provides a comprehensive summary of the key features in both plans and makes relevant comparisons. All aspects of the task are addressed with precision and accuracy.

**Coherence & Cohesion (9):** The report is exceptionally well-organized and easy to follow. The logical flow of information is seamless, and the use of cohesive devices is sophisticated and unobtrusive.

**Lexical Resource (8.5):** A wide range of sophisticated vocabulary is used accurately and appropriately. The language is precise and natural, demonstrating excellent control of lexical features.

**Grammatical Range & Accuracy (9):** The report demonstrates a wide range of grammatical structures with complete accuracy and fluency. The writing is grammatically impeccable.

## Model Answer #4

### Response:

The diagrams depict the existing layout of an airport and the planned layout following its renovation, which is scheduled to take place next year.

Overall, the airport is set to undergo significant expansion, including the introduction of new facilities and an increase in the number of gates. Major improvements will be seen in both the departure and arrival areas, with additional services and transportation options being incorporated.

In the departures area, several changes will be implemented. The number of exit doors will be doubled, and the existing café and check-in counters will be relocated to make space for a new bag drop facility. Additionally, new shops will be added adjacent to the passport control office, while shopping centers will be introduced along the passage leading to the gates. A significant increase in the number of gates is planned, rising from 8 to 18.

The arrivals area on the left-hand side of the airport will also see substantial changes. The current walkway will be replaced by a sky train, and there will be an increase in the number of entrance pathways. Moreover, a café, ATM center, and car hire services will be introduced next to the customs control section, providing more facilities for arriving passengers.

### Evaluation:

#### Overall Band Score: 9

**Task Response (9):** The report provides a comprehensive and accurate summary of the key features of the airport redevelopment plan, highlighting the main changes and comparisons effectively.

**Coherence & Cohesion (9):** The report is well-structured and logically organized, with clear transitions between paragraphs and ideas. The information flows smoothly and effortlessly.

**Lexical Resource (9):** The report demonstrates a wide range of vocabulary, using precise and sophisticated language to describe the airport layout and redevelopment plan.

**Grammatical Range & Accuracy (9):** The report exhibits excellent grammatical accuracy and a wide range of grammatical structures, with no errors or inconsistencies.

## Model Answer #5

### Response:

The diagrams illustrate the current layout of Southwest Airport and the proposed changes for its redevelopment in the coming year. Overall, while the security and passport control areas remain largely unchanged, significant alterations are planned for the gates, check-in, and other facilities.

Initially, the airport has only 8 gates located on the north side. In the redevelopment plan, these gates will be expanded to a total of 18, extending both northeast and northwest. The current walkways on the northwest side will be removed to make room for two new sky trains positioned centrally between the gates, enhancing passenger movement.

Below the expanded gates, a new shopping area will be introduced in the southwest section of the airport. Although the security and passport control areas in the southwest and southeast will stay the same, the check-in area in the southwest will be relocated to the opposite side and replaced by a new bag drop facility. Additionally, the coffee shop will be moved from its current location to be positioned below the new bag drop area.

Moreover, an ATM and a café will be established in the southwest, adjacent to a new car hire service. The departures area, initially centrally located, will be divided into two separate sections on the southeast side. Similarly, the arrivals area will follow the same pattern, facilitating better passenger flow and service efficiency.

### Evaluation:

#### Overall Band Score: 9

**Task Response (9):** The report provides a comprehensive and accurate overview of the changes proposed in the redevelopment plan. It effectively addresses all key aspects of the visual information, demonstrating a strong understanding of the task.

**Coherence & Cohesion (9):** The report is exceptionally well-organized and coherent. The information is presented logically, with clear transitions between paragraphs and sentences. The use of cohesive devices is seamless and contributes to the overall clarity and flow of the report.

**Lexical Resource (9):** The report demonstrates a wide range of vocabulary, using precise and sophisticated language to describe the changes in the airport layout. The choice of words is accurate and appropriate, reflecting a high level of lexical control.

**Grammatical Range & Accuracy (9):** The report exhibits a wide range of grammatical structures, used with accuracy and fluency. The sentences are varied and complex, demonstrating a high level of grammatical control. Punctuation is used correctly and effectively throughout.
