

Task 1: Map

Subject: The maps below show the centre of a small town called Islip as it is now, and plans for its development. Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Model Answer #1

Response:

The maps illustrate the current layout of Islip town centre and the proposed development plan.

Overall, significant changes are planned, including the addition of new housing areas and transport facilities. The main road will be modified, and a dedicated pedestrian zone will be introduced.

At present, shops line both sides of the main road, with housing located to the south and open countryside to the north. A school is positioned in the southwest, while a large park is in the southeast. The main road passes through the town centre, providing access to these areas.

In the future, the main road will be converted into a dual carriageway surrounding the central area. The shops on the northern side will be replaced by a shopping centre, alongside a bus station and a car park. The main road through the town centre will become a pedestrian-only zone. Additionally, new residential areas will be developed to the east and west, reducing the park's size. The school, however, will remain unchanged.

Evaluation:

Overall Band Score: 9

Task Response (9): Excellent summary of the main features and comparisons between the two maps. All key information is accurately reported.

Coherence & Cohesion (9): The report is exceptionally well-organized and easy to follow. The information flows logically, with clear transitions between paragraphs and ideas.

Lexical Resource (9): A wide range of sophisticated vocabulary is used accurately and appropriately. The language is precise and natural.

Grammatical Range & Accuracy (9): The grammar is flawless. A wide range of grammatical structures is used with complete accuracy and fluency.

Model Answer #2

Response:

The maps illustrate the current layout of Islip town center and the proposed development plan.

Overall, the redevelopment aims to modernize the town by adding new facilities, improving infrastructure, and reorganizing the traffic flow. The most notable changes involve replacing the current main road with a ring road carriageway encircling the town center and creating a pedestrian zone.

In the present layout, the main road runs through the center of the town, flanked by rows of shops. The area to the north of the road is countryside, while the southern section features housing, with a school to the southwest and a park to the southeast.

New facilities will be introduced to the northern part of the town, where the countryside currently exists. A bus station, a car park, and a large shopping center will be constructed alongside additional shops. Furthermore, new housing developments will be added in the northeast, near the park, which will remain slightly changed. Meanwhile, the southern area will retain much of its current structure, including the school and existing housing. However, the overall layout will be more organized, with the new infrastructure likely to attract more visitors and improve the town's functionality.

Evaluation:

Overall Band Score: 9

Task Response (9): Excellent response to the task. All key features are accurately described and compared.

Coherence & Cohesion (9): The report is exceptionally well-organized and easy to follow. The flow of information is natural and logical.

Lexical Resource (9): A wide range of sophisticated vocabulary is used accurately and appropriately. The language is precise and effective.

Grammatical Range & Accuracy (9): The grammar is flawless. A wide range of grammatical structures is used with complete accuracy and fluency.

Model Answer #3

Response:

The maps display the current layout of a center of a small town named Islip, and how it is planned to develop in the future.

Overall, the town center will be urbanized, and its road system will be significantly upgraded. In addition, several new amenities and housing areas will be built.

The most noticeable development will be the dual carriageway that will encircle most of the town center's facilities. This carriageway will connect the west side and the east side of the center, while the current main road will be widened and reserved for pedestrians. Furthermore, the town will also see the addition of a new bus station and a car park facing the shops on the south side.

Another new feature of the town will be a large shopping center, which will be constructed on part of the land that is currently occupied by the stores north of the main road. Moreover, new housing will be added on either side of the walking street. The southern housing area will be placed next to the park, and the northern one will have a driveway connecting to the dual carriageway.

Evaluation:

Overall Band Score: 9

Task Response (9): Excellent summary of the main features and comparisons. All key information is accurately reported.

Coherence & Cohesion (9): The report is exceptionally well-organized and easy to follow. The flow of information is natural and logical.

Lexical Resource (9): A wide range of sophisticated vocabulary is used accurately and appropriately. The language is precise and effective.

Grammatical Range & Accuracy (9): The grammar is flawless. A wide range of grammatical structures is used with complete accuracy and fluency.

Model Answer #4

Response:

The first map depicts the current layout of Islip's town center, while the second map illustrates the proposed alterations to the area for the future. Overall, the maps highlight significant changes to the infrastructure, with new facilities and road systems planned for the future.

One of the most prominent changes is the expansion of the main road, which will be transformed into a dual carriageway encircling the town center. Another notable transformation is the redevelopment of the shops in the northern section into new facilities, such as a bus station, a shopping center, and a car park.

In terms of residential developments, additional housing units are planned to be constructed adjacent to the newly expanded road. While the park has been reduced in size, the school located in the southern corner remains entirely unchanged.

Furthermore, a pedestrian-only pavement will replace the section of the main road through the centre, effectively separating the remaining shops from the newly developed facilities.

Evaluation:

Overall Band Score: 9

Task Response (9): Excellent overview of the main features and comparisons between the two maps. All key information is accurately reported.

Coherence & Cohesion (9): The report is exceptionally well-organized and easy to follow. The flow of information is natural and logical.

Lexical Resource (9): A wide range of sophisticated vocabulary is used accurately and appropriately. The language is precise and effective.

Grammatical Range & Accuracy (9): The grammar is flawless. A wide range of grammatical structures is used with complete accuracy and fluency.

Model Answer #5

Response:

The given diagrams illustrate the existing layout of Islip town center and proposed development plans for the future.

Overall, the planned transformation of Islip town center involves the conversion of the main road into a pedestrian walkway, the addition of new amenities such as a bus station and shopping center to the north, and the incorporation of new housing areas.

Currently, Islip town center is characterized by a central main road that bisects the town, bordered by shops on either side. Residential areas are situated to the east and west, with two housing estates to the south, flanking a park to the southeast and a school to the southwest.

In contrast, the proposed redevelopment envisions the main street being repurposed for pedestrian use. The northern section of the town will see the transformation of countryside land and shops into a bus station, shopping center, car park, and additional housing. Despite these changes, existing elements such as shops, the school, and some housing will be retained. Notably, the park will be reduced in size to accommodate new housing, and a dual carriageway will encircle the town of Islip.

Evaluation:

Overall Band Score: 9

Task Response (9): The report provides a comprehensive and accurate overview of the information presented in the maps. All key features are discussed and compared effectively.

Coherence & Cohesion (9): The report is well-structured and logically organized. The information flows smoothly, with clear transitions between paragraphs and ideas.

Lexical Resource (9): The report demonstrates a wide range of vocabulary, using precise and sophisticated language to describe the maps. The language is natural and appropriate for the task.

Grammatical Range & Accuracy (9): The report exhibits excellent grammatical accuracy and a wide range of grammatical structures. The sentences are varied and complex, demonstrating a high level of control over grammar.
