

Task 1: Map

Subject: The two maps below show an island, before and after the construction of some tourist facilities.

Model Answer #1

Response:

The two maps illustrate an island before and after the development of tourist facilities.

Before the construction, the island was largely undeveloped, with only a few palm trees and a beach on the western shore. The rest of the land was empty, with no visible infrastructure, and no paths or buildings.

After the development, significant changes were made to accommodate tourists. Several accommodations were built across the island, with two clusters of huts: one located to the west near the beach and another to the northeast. These accommodations are connected by footpaths, allowing easy access between the huts, the reception, and a newly constructed restaurant in the center of the island. Additionally, a pier was built on the southern coast, providing boat access for visitors. Vehicle tracks were also constructed, connecting the pier to the reception and the restaurant.

The beach area has been designated for swimming, and the natural environment, such as the palm trees, has been largely preserved. Overall, the island has undergone significant transformation, now offering a variety of tourist facilities while maintaining its natural features.

Evaluation:

Overall Band Score: 9

Task Response (9): Excellent overview of the key changes shown in the maps. All main features are accurately described and compared.

Coherence & Cohesion (9): The report flows smoothly and logically. Paragraphing is well-managed, and the information is easy to follow.

Lexical Resource (9): A wide range of sophisticated vocabulary is used accurately and appropriately. The language is natural and precise.

Grammatical Range & Accuracy (9): The grammar is accurate and varied throughout. Sentence structures are sophisticated and error-free.

Model Answer #2

Response:

The maps delineate the transformation of an island before and after the establishment of various tourist facilities.

Overall, the island underwent significant development, featuring an array of amenities designed to enhance the tourist experience, while retaining its natural greenery.

Prior to the development, the island was characterized by its lush palm trees and a comprehensive beach located in the left corner. Post-construction, a plethora of tourist-oriented structures have emerged, significantly altering the landscape. A large pier has been introduced at the southern part of the island, accommodating two vessels, thus facilitating maritime activities. Centrally positioned within the island, a reception area has been established, surrounded by vehicle tracks that provide access for both visitors and staff. The road culminates at a newly constructed modern restaurant situated at the northern end of the island, ensuring ease of accessibility for tourists.

Additionally, the transformation includes a well-designed beach area dedicated to swimming, complemented by a series of footpaths linking visitors to various amenities, including a collection of accommodations positioned in a circular formation. These huts offer a cozy staying option for guests. Importantly, the construction has been executed in a manner that preserves the existing tree coverage, highlighting a commitment to maintaining the island's natural charm. Notably, while the left side of the island has seen a concentration of infrastructure, the right side remains relatively open, indicating a deliberate choice to balance development with natural space.

Evaluation:

Overall Band Score: 9

Task Response (9): The report provides a comprehensive and accurate summary of the key changes shown in the maps. It effectively identifies and describes the main features of the island before and after development, highlighting the significant changes and the preservation of natural elements.

Coherence & Cohesion (9): The report is well-organized and easy to follow. The information is presented logically, with clear transitions between paragraphs and sentences. The use of cohesive devices enhances the flow and clarity of the report.

Lexical Resource (9): The report demonstrates a wide range of vocabulary, using precise and sophisticated language to describe the changes in the island. The choice of words is appropriate and effective, contributing to the overall clarity and impact of the report.

Grammatical Range & Accuracy (9): The report exhibits a high level of grammatical accuracy and fluency. The sentences are grammatically correct and varied, demonstrating a strong command of

English grammar.

Model Answer #3

Response:

The two maps illustrate the transformation of an island prior to and following the construction of various tourist facilities.

Overall, the development significantly altered the landscape, introducing numerous amenities that cater to tourists while preserving some natural elements.

Initially, the island was characterized by a natural coastline featuring a sandy beach and the presence of trees along the periphery. The environment was largely untouched, with the beach serving as a prominent natural attraction. Subsequent to the development, this area was enhanced with the addition of a range of facilities aimed at promoting tourism. Notably, a parking area was created to accommodate visitors, alongside the establishment of a restaurant and a reception area. The introduction of beach chairs and umbrellas further indicates a clear focus on leisure and relaxation for tourists.

Moreover, the post-development layout includes infrastructural improvements such as footpaths and vehicle tracks, enabling better accessibility across the island. A significant addition is the pier, which facilitates boat access, further enriching tourist experiences. Despite these developments, some natural features such as the beach and trees remain intact, suggesting a balance between commercial development and environmental preservation. The strategic integration of these modern amenities has transformed the island into a more appealing destination for tourists.

Evaluation:

Overall Band Score: 9

Task Response (9): The report provides a comprehensive and accurate summary of the key changes shown in the maps. It effectively identifies and compares the main features, demonstrating a clear understanding of the task.

Coherence & Cohesion (9): The report is well-structured and logically organized. The information flows smoothly, with clear transitions between paragraphs and sentences. The use of cohesive devices is sophisticated and contributes to the overall clarity and coherence of the report.

Lexical Resource (9): The report demonstrates a wide range of vocabulary, used accurately and appropriately. The language is precise and varied, reflecting a high level of lexical sophistication.

Grammatical Range & Accuracy (9): The report exhibits a wide range of grammatical structures, used with accuracy and fluency. The grammar is error-free, and the punctuation is used correctly throughout.

Model Answer #4

Response:

The two maps illustrate the transformation of an island before and after the establishment of tourist facilities.

Overall, the development significantly altered the landscape of the island, introducing various amenities while reducing its natural features.

Initially, the island was characterized by its natural coastline, featuring a pristine beach bordered by trees, providing a tranquil environment. However, following the construction phase, the area underwent considerable changes. Notably, a diverse range of tourist accommodations was erected, including several lodging options, alongside a reception area and a restaurant. Moreover, improvements to accessibility were evident, with newly constructed footpaths and vehicle tracks connecting the various facilities.

In addition to the aforementioned structures, the updated map reveals the installation of a parking lot to accommodate visitors' vehicles. The beach area has been enhanced with the addition of chairs and umbrellas, facilitating leisure activities for tourists. Furthermore, a new pier was constructed to support boating activities, with two boats stationed at the designated docking area. The reconfiguration of the island's layout has thus transformed it into a more accessible and inviting destination for tourists, albeit at the expense of some of its original natural charm.

Evaluation:

Overall Band Score: 9

Task Response (9): The report provides a comprehensive and accurate description of the changes shown in the maps. All key features are mentioned and explained clearly.

Coherence & Cohesion (9): The report is well-organized and easy to follow. Paragraphs are used effectively to separate different aspects of the development.

Lexical Resource (9): A wide range of vocabulary is used accurately and appropriately, demonstrating a sophisticated command of language.

Grammatical Range & Accuracy (9): The report is grammatically accurate and uses a variety of sentence structures effectively.

Model Answer #5

Response:

The two maps illustrate the same island before and after significant development for tourism purposes.

In the initial state, the island is depicted as largely undeveloped, featuring a beach on its western coast and stretching approximately 250 meters in length. There are no built structures, and the landscape appears to be in its natural form.

The subsequent map showcases extensive developments aimed at enhancing tourism. Two distinct accommodation areas have been established: one situated adjacent to the western beach and the other centrally located on the island. To the north of the central accommodation, a restaurant has been constructed, and a central reception area is positioned just south of this restaurant. This reception area is encircled by a vehicle track, which provides access to various parts of the island. This track extends southwards to a newly constructed pier, facilitating sailing activities in the southern waters. Additionally, a footpath has been laid connecting the western accommodation units directly to the beach, enhancing accessibility for tourists. The western beach is now designated for swimming, further adding to the recreational opportunities available.

Overall, the transformation of the island is substantial, with the introduction of numerous facilities and infrastructure aimed at promoting tourism. The island has been effectively converted from a natural, undeveloped area into a vibrant tourist destination, offering a variety of amenities and activities for visitors.

Evaluation:

Overall Band Score: 9

Task Response (9): The report provides a comprehensive and accurate summary of the key changes shown in the maps. It effectively identifies and describes the main features of the island before and after development, making relevant comparisons.

Coherence & Cohesion (9): The report is well-structured and logically organized. The information flows smoothly, with clear transitions between paragraphs and sentences. The use of cohesive devices is sophisticated and contributes to the overall clarity and coherence of the report.

Lexical Resource (9): The report demonstrates a wide range of vocabulary, used accurately and appropriately. The language is precise and varied, reflecting a high level of lexical sophistication.

Grammatical Range & Accuracy (9): The report exhibits a wide range of grammatical structures, used with accuracy and fluency. The grammar is error-free, and the punctuation is used correctly throughout.
