

## Task 1: Map

**Subject:** The two maps below show road access to a city hospital in 2007 and in 2010. Summarise the information by selecting and reporting the main feature, and make comparisons where relevant.

## Model Answer #1

### Response:

The two maps illustrate the changes made to the road access system around a city hospital between 2007 and 2010.

Overall, significant improvements were made to enhance accessibility, particularly for buses and private vehicles. The introduction of a bus station, separate parking areas, and two roundabouts contributed to a more organized and efficient transportation system.

In 2007, access to the hospital was primarily through Hospital Road, which connected to City Road. There were bus stops along Hospital Road, but no designated station. Additionally, a single car park for both staff and the public was located on the east side of the hospital.

By 2010, major modifications had taken place. Two roundabouts were installed at key junctions: one at the intersection of Hospital Road and City Road, and another where the ring road meets Hospital Road. A bus station was constructed on the west side of Hospital Road, replacing the old bus stops. Furthermore, parking was restructured: the original parking area became staff-only, while a new public car park was built to the east of the hospital.

In summary, the hospital's transport infrastructure was significantly improved by 2010, with dedicated facilities for buses and clearer separation of parking spaces, ensuring more efficient access for visitors and staff.

### Evaluation:

#### Overall Band Score: 9

**Task Response (9):** The report fully addresses all parts of the task. It accurately describes the maps and makes relevant comparisons between the two years.

**Coherence & Cohesion (9):** The report is exceptionally well-organized and easy to follow. The information flows logically, with clear transitions between paragraphs and ideas.

**Lexical Resource (9):** A wide range of sophisticated vocabulary is used accurately and appropriately. The language is precise and natural.

**Grammatical Range & Accuracy (9):** The grammar is flawless. A wide range of grammatical structures is used with complete accuracy and fluency.

## Model Answer #2

### Response:
