

# Task 1: Process Diagram

**Subject:** The diagram below shows the manufacturing process for making sugar from sugar cane. Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

## WRITING

### WRITING TASK 1

You should spend about 20 minutes on this task.

*The diagram below shows the manufacturing process for making sugar from sugar cane.*

*Summarise the information by selecting and reporting the main features, and make comparisons where relevant.*

Write at least 150 words.

## Answer #1

### Response:

The diagrams provide a detailed illustration of the manufacturing process involved in producing sugar from sugar cane.

Overall, the process consists of six main steps, including harvesting and crushing of sugar cane, purifying the juice with a limestone filter, evaporation to form sugar crystals, centrifugation to separate sugar crystals from syrup, and finally, the drying and cooling of the sugar crystals.

To begin with, the process initiates with the harvesting of sugar cane using large machinery, followed by the crushing of the sugar cane to extract the juice. This juice is then purified by adding a limestone filter, which helps in removing impurities. Subsequently, the purified juice undergoes evaporation to form sugar crystals, a crucial step in the production of sugar.

Moving on to the later stages of the process, the sugar crystals are separated from the syrup through the utilization of a centrifuge, ensuring efficient extraction of the desired product. Finally, the sugar crystals are dried and cooled, ready for packaging and distribution to consumers. This meticulous manufacturing process ensures the production of high-quality sugar from sugar cane.

### Scores:

Overall Band Score: 9

Task Response: 9 - The report fully addresses the task by providing a detailed overview of the manufacturing process for making sugar from sugar cane in six steps.

Coherence & Cohesion: 9 - The report is well-structured with clear paragraphing and logical progression of ideas. Cohesive devices are effectively used to maintain the flow of information.

Lexical Resource: 9 - The report demonstrates a wide range of vocabulary related to the manufacturing process of sugar from sugar cane. The vocabulary used is precise and accurate, enhancing the overall quality of the report.

Grammatical Range & Accuracy: 9 - A variety of grammatical structures are employed accurately throughout the report. Punctuation and grammar are used correctly, contributing to the clarity of the writing.
