

# Task 1: Map

**Subject:** The plan below shows a student room for two people and a student room for one person at an Australian university.

**Student room for two people, \$350/week**

**Student room for one person, \$200/week**

## KEY

Bookshelf

Television

Microwave

Sink

Stove

Cupboard

Table and chairs

## Model Answer #1

### Response:

The diagrams provided illustrate the floor plans and associated costs of two distinct types of student accommodation at an Australian university: a shared room suitable for two occupants and a private room designed for a single resident.

It is evident that the shared room is priced higher than the private room, yet it offers a more spacious layout complemented by additional furniture and facilities.

The shared accommodation, which caters to two individuals, is available at a weekly rate of \$350. This room encompasses a total area of 24 square meters (6 meters by 4 meters) and is furnished with two beds, each paired with a study desk and a cupboard. The layout is efficiently designed, featuring a bathroom positioned to the left of the entrance, while the kitchenette—with essential appliances such as a sink, stove, and microwave—adjoins the bathroom along the left wall. Additionally, this room includes a small dining area equipped with a table and two chairs, providing a communal space for the residents. A bookshelf is conveniently located next to one of the study desks, further enhancing the functionality of the shared environment.

In contrast, the private room, priced at a more economical \$200 per week, spans an area of 15 square meters (6 meters by 2.5 meters). Although this room offers a single bed and a study desk, it lacks the additional furniture found in the shared accommodation. Similar to its counterpart, the private room features a bathroom on the left side of the entrance, with the kitchenette directly in front. However, this layout does not include a dining area or cupboards, thereby reducing the available storage and communal space. The single occupant enjoys a higher degree of privacy, albeit within a more compact area compared to the shared room.

### Evaluation:

#### Overall Band Score: 9

**Task Response (9):** Excellent response to the task. All aspects of the diagrams are accurately described and compared.

**Coherence & Cohesion (9):** The report is exceptionally well-organized and easy to follow. The comparison between the two rooms is clear and logical.

**Lexical Resource (9):** A wide range of sophisticated vocabulary is used accurately and appropriately. The language is natural and precise.

**Grammatical Range & Accuracy (9):** The grammar is flawless. A wide range of grammatical structures is used with complete accuracy and fluency.

## Model Answer #2

### Response:

The given diagrams illustrate the layout of two different student rooms at an Australian university.

Overall, the main differences between the two rooms are the price, the size, the features of each room, and how many people each room can accommodate. As can be seen, the first room is the larger, more expensive one, and has more features as well as can accommodate a greater number of people.

The first room is suitable for two people and costs \$350 per week, while the second room is only suitable for one person and costs \$200 per week. The first room is also significantly larger, at 6m x 4m, compared with the second room, which is only 6m x 2.5m.

The first room contains two beds, two study desks, two televisions, two cupboards, a bookshelf, and a table and chairs. Meanwhile, the second room only features one bed, one study desk, and one television, but has no cupboards, bookshelf, or table and chairs. Both rooms have similar kitchen and bathroom facilities.

### Evaluation:

#### Overall Band Score: 9

**Task Response (9):** Excellent response to the task. All key features are accurately described and compared.

**Coherence & Cohesion (9):** The report is exceptionally well-organized and easy to follow. The paragraphs flow logically, and the cohesive devices are used effectively.

**Lexical Resource (9):** A wide range of sophisticated vocabulary is used accurately and appropriately. The language is natural and precise.

**Grammatical Range & Accuracy (9):** The grammar is flawless. A wide range of grammatical structures is used with complete accuracy and fluency.

## Model Answer #3

### Response:

The diagram illustrates the design and features of two student housing options available in Australia: one intended for two occupants and the other intended for a single resident.

Overall, the dual-occupancy room is more spacious and furnished with additional amenities, resulting in a higher rental price compared to the single-occupancy room.

In terms of dimensions, both accommodations share a length of 6 meters. However, the dual-occupancy room is wider, measuring 4 meters across, whereas the single-occupancy room is narrower at 2.5 meters, which contributes to the disparity in weekly rental costs (\$350 versus \$200).

For a weekly rate of \$350, a student can share a 6-meter by 4-meter room with another resident. The bathroom is situated in the left corner of the space. Kitchen appliances, including a sink, stove, and microwave, are located in the bottom left corner. Adjacent to the microwave is a television, positioned opposite a dining table and chairs. The room includes two beds, each accompanied by a study desk; the first bed is placed in the top right corner, while the second is in the bottom right corner. Additionally, a bookshelf is situated between the bathroom and one of the study desks.

In contrast, the single room, priced at \$200 per week, features a more streamlined layout. This accommodation measures 6 by 2.5 meters. The bathroom is located in the top left corner, opposite the kitchen appliances. A television is positioned next to the study desk, and finally, a bed is placed in the right corner of the room near the windows.

### Evaluation:

#### Overall Band Score: 9

**Task Response (9):** Excellent response to the task. All aspects of the visual information are accurately described in a well-organized manner.

**Coherence & Cohesion (9):** The report is exceptionally well-structured and easy to follow. The flow of information is natural and logical.

**Lexical Resource (9):** A wide range of sophisticated vocabulary is used accurately and appropriately. The lexical choices enhance the clarity and precision of the description.

**Grammatical Range & Accuracy (9):** The grammar is impeccable. A wide range of grammatical structures is used with complete accuracy and fluency.
