

Task 1: Multiple Graphs

Subject: The chart below shows the percentage of water used for different purposes in six areas of the world

Model Answer #1

Response:

The given pie charts present information about the amount of water consumption for three different purposes: industrial, agricultural, and domestic uses, in six various countries. Overall, water is mostly used for agricultural purposes except in Europe and North America, while household uses take the least amount of water.

According to the pie charts, the largest proportion of the water is used for agricultural uses in Central Asia, Africa, Southeast Asia, and South America, accounting for more than four-fifths at 88%, 84%, 81%, and 71%, respectively. In contrast to these four countries, the highest percentage of water used for industrial purposes is seen in Europe and North America, accounting for 53% and 48%, respectively.

Central and Southeast Asia consumed the same amount of water for domestic uses, comprising little more than one in twenty. The percentage of water consumption in Africa for domestic purposes is very similar to central and south Asia, at 9%, while South America, Europe, and North America utilize more than one in ten, at 19%, 15%, and 13%, respectively.

Evaluation:

Overall Band Score: 9

Task Response (9): The report provides a comprehensive and accurate overview of the data presented in the pie charts. It effectively addresses all aspects of the task, demonstrating a clear understanding of the information.

Coherence & Cohesion (9): The report is well-organized and logically structured. The information flows smoothly, with clear transitions between paragraphs and sentences. The use of cohesive devices enhances the overall clarity and readability.

Lexical Resource (8.5): The report demonstrates a wide range of vocabulary, using precise and appropriate language to describe the data. The use of synonyms and varied sentence structures adds to the sophistication of the language.

Grammatical Range & Accuracy (9): The report exhibits excellent grammatical accuracy and a wide range of grammatical structures. The use of complex sentences and varied punctuation contributes to the overall fluency and clarity of the writing.

Model Answer #2

Response:

The pie charts below illustrate the distribution of water usage across different sectors in six regions of the world.

Overall, the largest part of the water is used for agricultural purposes in Central Asia, South East Asia, Africa, and South America, while in North America and Europe, it is aimed mainly at industry. Meanwhile, water used for domestic reasons constituted a negligible amount in all six parts of the world.

In detail, the amount of water used for household purposes in Central and South East Asia is equal, comprising only 7% of the total water consumption in these areas. In Central Asia, Africa, and South East Asia, the proportion of water utilization for agriculture was higher than 80%, with 88%, 84%, and 81% of the total, respectively, while the number that represents it in South America is only about 10% lower than those areas, making 71% of the total.

Furthermore, the percentage, which depicts water consumed for industry in Europe and North America, made the highest contribution to the water consumption in these zones, constituting almost half of it (53% and 48% respectively), whilst it is the smallest part of the water utilization in South America, at 10%. Meanwhile, the proportion, which represents the water that is utilized in households, is 15%.

Evaluation:

Overall Band Score: 9

Task Response (9): The report provides a comprehensive and accurate overview of the data presented in the pie charts. It effectively addresses all aspects of the task, demonstrating a clear understanding of the information.

Coherence & Cohesion (9): The report is well-organized and logically structured. The information flows smoothly, with clear transitions between paragraphs and sentences. The use of cohesive devices enhances the overall clarity and readability.

Lexical Resource (9): The report demonstrates a wide range of vocabulary, using precise and appropriate language to describe the data. The language is sophisticated and natural, with no noticeable errors or limitations.

Grammatical Range & Accuracy (9): The report exhibits a high level of grammatical accuracy and fluency. A wide range of grammatical structures is used correctly and effectively, contributing to the overall clarity and sophistication of the writing.

Model Answer #3

Response:

The pie charts below illustrate the distribution of water usage across different sectors in six regions of the world.

Overall, the largest part of the water is used for agricultural purposes in Central Asia, South East Asia, Africa, and South America, while in North America and Europe, it is aimed mainly at industry. Meanwhile, water used for domestic reasons constituted a negligible amount in all six parts of the world.

In detail, the amount of water used for household purposes in Central and South East Asia is equal, comprising only 7% of the total water consumption in these areas. In Central Asia, Africa, and South East Asia, the amount of water utilization for agriculture was higher than 80%, with 88%, 84%, and 81% of the total, respectively, while the number that represents it in South America is only about 10% lower than those areas, making 71% of the total.

Furthermore, the percentage, which depicts water consumed for industry in Europe and North America, made the highest contribution to the water consumption in these zones, constituting almost half of it (53% and 48% respectively), whilst it is the smallest part of the water utilization in South America, at 10%. Meanwhile, the proportion, which represents the water that is utilized in households, is 15%.

Evaluation:

Overall Band Score: 9

Task Response (9): The report provides a comprehensive and accurate overview of the data presented in the charts. All key features are identified and discussed in detail.

Coherence & Cohesion (9): The report is well-structured and logically organized. The information flows smoothly and effortlessly, with clear transitions between paragraphs and ideas.

Lexical Resource (8.5): The report demonstrates a wide range of vocabulary, including sophisticated and precise terms related to water usage and distribution. The language is natural and fluent.

Grammatical Range & Accuracy (9): The report exhibits a wide range of grammatical structures, used accurately and appropriately. The grammar and punctuation are flawless.

Model Answer #4

Response:

The pie charts below illustrate the proportion of water consumed in six main areas of the world by purpose.

Overall, the largest part of the water is used for agricultural purposes in Central Asia, South East Asia, Africa, and South America, while in North America and Europe, it is aimed mainly at industry. Meanwhile, water used for domestic purposes contained a negligible amount in all six parts of the world.

In detail, the amount of water used for household purposes in Central Asia and South East Asia is equal, comprising only 7% of the total water consumption in these areas. In Central Asia, Africa, and South East Asia, the amount of water consumption for agriculture was higher than 80%, with 88%, 84%, and 81% of the total, respectively, while the number that represents it in South America is only about 10% lower than those areas, making 71 percent of the total.

Furthermore, the percentage, which depicts water consumed for industry in Europe and North America, made the highest contribution to the water consumption in these zones, constituting almost half of it (53% and 48%, respectively), while it is the smallest part of the water consumption in South America, at 10%. Meanwhile, the percentage, which represents the water that is utilized in households, is 15%.

Evaluation:

Overall Band Score: 9

Task Response (9): The report provides a comprehensive and accurate overview of the data presented in the pie charts. It effectively addresses all aspects of the task, demonstrating a clear understanding of the information.

Coherence & Cohesion (9): The report is well-organized and logically structured. The information flows smoothly, with clear transitions between paragraphs and sentences. The use of cohesive devices enhances the overall clarity and readability.

Lexical Resource (8.5): The report demonstrates a wide range of vocabulary, using precise and appropriate language to describe the data. The use of synonyms and varied sentence structures adds to the sophistication of the language.

Grammatical Range & Accuracy (9): The report exhibits excellent grammatical accuracy and a wide range of grammatical structures. The use of complex sentences and varied sentence lengths contributes to the overall fluency and sophistication of the writing.

Model Answer #5

Response:

The given pie charts present information about the amount of water consumption for three different purposes: industrial, agricultural, and domestic uses, in six various countries. Overall, water is mostly used for agricultural purposes except in Europe and North America, while household uses take the least amount of water.
