

Task 1: Bar Chart

Subject: The bar chart below illustrates five different industries' percentage share of Brazil's economy in 2009 and 2019 with a forecast for 2029. Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Model Answer #1

Response:

The bar chart presents data on the percentage contribution of five diverse industries to Brazil's economy in 2009, 2019, and projects their share in 2029.

The chart showcases a notable shift in the composition of Brazil's economy over the two decades, with significant growth anticipated in food processing and a decline in the finance sector. The tourism industry remained consistent throughout the period, while manufacturing and oil, coal, and gas sectors have experienced fluctuations.

The finance sector, which dominated the Brazilian economy in 2009, holding a substantial 40% share, witnessed a dramatic decline to 20% in 2019. This downward trend is projected to continue, with the sector's share estimated to reach a mere 5% in 2029. Conversely, the food processing industry has exhibited a remarkable upward trajectory, rising from 10% in 2009 to 25% in 2019. This growth is expected to continue, with a projected share of 35% in 2029, indicating a significant shift in the contribution of this sector to the Brazilian economy.

The manufacturing sector, while initially representing a notable 17% of the economy in 2009, saw a slight decrease to 15% in 2019 and is expected to remain relatively stable at approximately 15% in 2029. The oil, coal, and gas industry experienced a substantial increase from 20% in 2009 to 35% in 2019, but is predicted to experience a downturn, reaching 30% in 2029. In contrast to the volatile trends observed in the other sectors, the tourism industry has consistently contributed a stable 25% to the Brazilian economy across all three years, highlighting its resilience and importance.

Evaluation:

Overall Band Score: 9

Task Response (9): The report provides a comprehensive and accurate overview of the data presented in the bar chart, addressing all aspects of the task.

Coherence & Cohesion (9): The report is well-structured and logically organized, with clear transitions between paragraphs and sentences. The information flows smoothly and effortlessly.

Lexical Resource (9): The report demonstrates a wide range of vocabulary, using precise and sophisticated language to describe the trends and changes in the data. The language is natural and appropriate for the academic context.

Grammatical Range & Accuracy (9): The report exhibits a wide range of grammatical structures, used accurately and with complete control. The grammar and punctuation are flawless.
