

Task 1: Multiple Graphs

Subject: The pie chart shows the amount of money that a children's charity located in the USA spent and received in one year. Summarize the information by selecting and reporting the main features and make comparisons where relevant.

Model Answer #1

Response:

The pie charts show the amount of revenue and expenditures in 2016 for a children's charity in the USA. Overall, it can be seen that donated food accounted for the majority of the income, while program services accounted for the most expenditure. Total revenue sources just exceeded outgoings.

In detail, donated food provided most of the revenue for the charity, at 86%. Similarly, with regard to expenditures, one category, program services, accounted for nearly all of the outgoings, at 95.8%.

The other categories were much smaller. Community contributions, which were the second largest revenue source, brought in 10.4% of overall income, and this was followed by program revenue, at 2.2%. Investment income, government grants, and other income were very small sources of revenue, accounting for only 0.8% combined.

There were only two other expenditure items, fundraising and management and general, accounting for 2.6% and 1.6% respectively. The total amount of income was \$53,561,580, which was just enough to cover the expenditures of \$53,224,896

Evaluation:

Overall Band Score: 9

Task Response (9): The report fully addresses the task by summarizing the main features of the revenue sources and expenditures shown in the pie charts for a children's charity in the USA in 2016. Relevant comparisons are made, and the key information is accurately presented.

Coherence & Cohesion (9): The report is well-structured with clear paragraphs that logically present the information. Cohesive devices are effectively used to link ideas and facilitate understanding. The overall flow of the report is smooth and easy to follow.

Lexical Resource (9): A wide range of vocabulary is used accurately and precisely throughout the report. The language is sophisticated and demonstrates a high level of lexical resource. Terminology related to finance and charity operations is appropriately utilized.

Grammatical Range & Accuracy (9): The report showcases a variety of grammatical structures used accurately. There are no errors in punctuation or grammar, and the sentences are complex and well-constructed. The overall language proficiency is excellent.

Model Answer #2

Response:

The pie charts show the amount of revenue and expenditures in 2016 for a children's charity in the USA. Overall, it can be seen that donated food accounted for the majority of the income, while program services accounted for the most expenditure. Total revenue sources just exceeded outgoings.

In detail, donated food provided most of the revenue for the charity, at 86%. Similarly, with regard to expenditures, one category, program services, accounted for nearly all of the outgoings, at 95.8%.

The other categories were much smaller. Community contributions, which were the second largest revenue source, brought in 10.4% of overall income, and this was followed by program revenue, at 2.2%. Investment income, government grants, and other income were very small sources of revenue, accounting for only 0.8% combined.

There were only two other expenditure items, fundraising and management and general, accounting for 2.6% and 1.6% respectively. The total amount of income was \$53,561,580, which was just enough to cover the expenditures of \$53,224,896.

Evaluation:

Overall Band Score: 9

Task Response (9): The report fully addresses the task by providing a detailed overview of the revenue sources and expenditures of a USA charity in 2016 based on the information from the pie charts. The key features are accurately summarized, and the overall comparison is well-analyzed.

Coherence & Cohesion (9): The report is logically structured with clear paragraphs that smoothly transition from one point to the next. Cohesive devices are effectively used to link ideas and maintain the flow of information. The use of cohesive devices and paragraphing is skillfully managed throughout.

Lexical Resource (9): The report demonstrates a wide range of vocabulary with precise and accurate use of terms. The language used is sophisticated and natural, enhancing the overall quality of the report. The vocabulary is highly appropriate and contributes to a clear and coherent presentation of information.

Grammatical Range & Accuracy (9): A wide range of grammatical structures is used accurately and effectively. The report showcases full control over grammar and punctuation, leading to a smooth and coherent presentation of ideas. There are no errors that impact the overall clarity or accuracy of the report.

Model Answer #3

Response:

The pie charts show the amount of revenue and expenditures in 2016 for a children's charity in the USA. Overall, it can be seen that donated food accounted for the majority of the income, while program services accounted for the most expenditure. Total revenue sources just exceeded outgoings.

In detail, donated food provided most of the revenue for the charity, at 86%. Similarly, with regard to expenditures, one category, program services, accounted for nearly all of the outgoings, at 95.8%.

The other categories were much smaller. Community contributions, which were the second largest revenue source, brought in 10.4% of overall income, and this was followed by program revenue, at 2.2%. Investment income, government grants, and other income were very small sources of revenue, accounting for only 0.8% combined.

There were only two other expenditure items, fundraising and management and general, accounting for 2.6% and 1.6% respectively. The total amount of income was \$53,561,580, which was just enough to cover the expenditures of \$53,224,896.

Evaluation:

Overall Band Score: 9

Task Response (9): The report fully addresses the task by summarizing the key points of the revenue sources and expenditures of a USA charity in 2016. The key features of the pie charts are accurately described, and an overall comparison is provided.

Coherence & Cohesion (9): The report is well-structured with clear paragraphs that logically present the information. Transition words are effectively used to guide the reader through the comparisons. The information is presented in a cohesive and coherent manner.

Lexical Resource (9): A wide range of vocabulary is used accurately to describe the visual information. Precise and varied vocabulary choices enhance the report's quality. The language used is sophisticated and demonstrates a high level of lexical resource.

Grammatical Range & Accuracy (9): The report showcases a wide range of grammatical structures used accurately. Sentences are varied and well-constructed, contributing to the overall clarity of the report. There are no grammatical errors impacting understanding.

Model Answer #4

Response:

The pie charts show the amount of revenue and expenditures in 2016 for a children's charity in the USA. Overall, it can be seen that donated food accounted for the majority of the income, while program services accounted for the most expenditure. Total revenue sources just exceeded outgoings.

In detail, donated food provided most of the revenue for the charity, at 86%. Similarly, with regard to expenditures, one category, program services, accounted for nearly all of the outgoings, at 95.8%.

The other categories were much smaller. Community contributions, which were the second largest revenue source, brought in 10.4% of overall income, and this was followed by program revenue, at 2.2%. Investment income, government grants, and other income were very small sources of revenue, accounting for only 0.8% combined.

There were only two other expenditure items, fundraising and management and general, accounting for 2.6% and 1.6% respectively. The total amount of income was \$53,561,580, which was just enough to cover the expenditures of \$53,224,896.

Evaluation:

Overall Band Score: 9

Task Response (9): The report fully addresses the task by summarizing the key information presented in the pie charts regarding the revenue sources and expenditures of a children's charity in the USA in 2016. The overview provided is clear and covers all the main points.

Coherence & Cohesion (9): The report is well-organized with a clear introduction, body paragraphs describing the details of revenue sources and expenditures, and a concise conclusion. The information is presented logically, and there is a good use of cohesive devices to link ideas and paragraphs together.

Lexical Resource (9): The report demonstrates a wide range of vocabulary related to financial terms and charity organizations. The language used is precise, accurate, and sophisticated, enhancing the overall quality of the report.

Grammatical Range & Accuracy (9): There is a variety of grammatical structures used effectively throughout the report. The sentences are well-constructed, and there are no errors in grammar or punctuation, leading to a smooth and coherent presentation of ideas.

Model Answer #5

Response:

The pie charts show the amount of revenue and expenditures in 2016 for a children's charity in the USA. Overall, it can be seen that donated food accounted for the majority of the income, while program services accounted for the most expenditure. Total revenue sources just exceeded outgoings.

In detail, donated food provided most of the revenue for the charity, at 86%. Similarly, with regard to expenditures, one category, program services, accounted for nearly all of the outgoings, at 95.8%.
