

Task 1: Table

Subject: The table shows the amount of money given to developing countries by the USA, EU countries and other countries from 2006 to 2010 (Figures are in millions of dollars).

	2006	2007	2008	2009	2010
USA	9,8	11	17	16,7	20,3
EU	3,1	3,4	3,9	3,6	4,1
Other countries	2,8	3,2	3,5	3,2	3,7
Total	15,7	17,6	24,4	23,5	28,1

Model Answer #1

Response:

The table illustrates the expenditure on national development by the USA, EU, and other countries during the period from 2006 to 2010.

Overall, the USA's expenditure was the highest among the three entities for the entire five-year period. In contrast, the funding provided by other countries consistently had the lowest figures across all regions.

In 2006, the amount of money from America allocated to developing nations was 9.8 million dollars, compared to 3.1 million dollars from Europe and 2.8 million dollars from other nations. Over the following two years, this amount gradually increased in all regions, although it experienced a slight drop of about 0.3 million dollars in 2009 before rising again in 2010. A similar trend can be observed in the total amount donated by all nations, which grew from 15.7 million to 28.1 million, with the exception of a decline of 0.9 million dollars in 2009.

Finally, in 2010, the USA continued to lead the world in terms of total funding provided to developing nations, contributing 20.3 million dollars—three times more than the combined contributions of the EU and other areas, which were 4.1 million and 3.7 million dollars, respectively.

Evaluation:

Overall Band Score: 9

Task Response (9): Excellent overview of the data. All key features are accurately described and analyzed.

Coherence & Cohesion (9): The report is exceptionally well-structured and easy to follow. The flow of information is natural and logical.

Lexical Resource (8.5): A wide range of sophisticated vocabulary is used accurately and appropriately. The language is precise and effective.

Grammatical Range & Accuracy (9): The grammar is impeccable. A wide range of grammatical structures is used with complete accuracy and fluency.

Model Answer #2

Response:

The table illustrates the amount of money donated to developing countries by the USA, the EU, and other countries between 2006 and 2010. Units are measured in millions of dollars.

Overall, it is evident that the USA provided the highest amount of aid throughout the period, while other countries contributed the least. All three sources experienced an upward trend over the five years, despite some fluctuations.

In detail, the USA started at 9.8 million dollars in 2006, rising steadily to 11 million in 2007 and peaking at 17 million in 2008. However, this figure experienced a slight decline to 16.7 million in 2009 before increasing significantly to 20.3 million by 2010.

Turning to the EU, it began the period at 3.1 million dollars and rose consistently to 3.9 million in 2008. However, there was a slight decrease to 3.6 million in 2009, followed by a recovery to 4.1 million in the final year.

Contributions from other countries were comparatively smaller. Starting at 2.8 million in 2006, the amount increased to 3.5 million in 2008 before dropping slightly to 3.2 million in 2009. By 2010, it rose again to 3.7 million, marking a gradual overall

Evaluation:

Overall Band Score: 9

Task Response (9): The report fully addresses all parts of the task and provides a comprehensive summary of the data.

Coherence & Cohesion (9): The report is exceptionally well-organized and easy to follow. The flow of information is natural and logical, with clear transitions between paragraphs and ideas.

Lexical Resource (9): A wide range of sophisticated vocabulary is used accurately and appropriately. The language is precise and effective in conveying the information.

Grammatical Range & Accuracy (9): The report demonstrates a wide range of grammatical structures with complete accuracy and fluency. The writing is error-free.

Model Answer #3

Response:

The table presents the financial aid provided by the USA, the European Union (EU), and other nations to developing countries over a five-year period from 2006 to 2010. The figures are given in millions of US dollars and showcase the trends in international development assistance.

Overall, it is evident that the total amount of aid disbursed to developing countries experienced a significant upward trend during the specified period. The USA was by far the most generous donor, contributing the largest share of the total aid, while the amount given by the EU and other countries displayed more modest increases.

The United States emerged as the leading donor throughout the five-year period. The country's financial support for developing nations exhibited a consistent upward trajectory, rising from 9.8 billion US dollars in 2006 to a peak of 20.3 billion US dollars in 2010. This represents a substantial increase of over 100% compared to the initial year.

The European Union, as a collective entity, also played a significant role in providing development assistance. Although the EU's contributions were lower than those of the USA, they followed a generally upward trend over the five-year period. The EU's aid increased from 3.1 billion US dollars in 2006 to 4.1 billion US dollars in 2010, indicating a more gradual growth rate compared to the USA.

The remaining countries, collectively referred to as "other countries," contributed a smaller but nonetheless notable portion of the total aid. Their contributions displayed a relatively steady increase from 2.8 billion US dollars in 2006 to 3.7 billion US dollars in 2010. While the growth rate was less pronounced than that of the USA and the EU, it still demonstrates a consistent commitment to supporting developing nations.

Evaluation:

Overall Band Score: 9

Task Response (9): Excellent response to the task. All key features of the data are accurately described and analyzed.

Coherence & Cohesion (9): The report is very well-organized and easy to follow. Paragraphing is excellent and the flow of ideas is logical and smooth.

Lexical Resource (8.5): A wide range of vocabulary is used accurately and appropriately. The language is sophisticated and natural.

Grammatical Range & Accuracy (9): The report demonstrates a wide range of grammatical structures with complete accuracy and fluency.
