

Task 1: Line Graph

Subject: The graph below gives information on the number of participants for different activities at one social centre in Melbourne, Australia for the period 2000 to 2020.

Model Answer #1

Response:

The graph provides information on the number of participants in various activities at a social center in Melbourne, Australia, from 2000 to 2020. The activities include film club, martial arts, amateur dramatics, table tennis, and musical performances.

The film club consistently had the highest number of participants, starting at around 60 in 2000 and slightly increasing to about 65 by 2020. Martial arts began with approximately 35 participants in 2000 but gradually declined to around 25 by 2020. Amateur dramatics had about 25 participants in 2000, fluctuating to a peak of 30 in 2005 and 2015 before falling to 15 by 2020.

Table tennis maintained relatively stable numbers, starting at 20 participants in 2000 and increasing slightly to 25 by 2020. Musical performances started with nearly zero participants in 2000 but saw significant growth, reaching around 20 participants by 2020.

In summary, the film club remained the most popular activity, while musical performances experienced the most notable increase in participation. In contrast, martial arts and amateur dramatics saw declines, and table tennis showed a slight upward trend.

Evaluation:

Overall Band Score: 9

Task Response (9): The report provides a comprehensive and accurate overview of the data presented in the graph.

Coherence & Cohesion (9): The report is well-organized and easy to follow. The information is presented in a logical order, and the paragraphs flow smoothly together.

Lexical Resource (8.5): The report demonstrates a wide range of vocabulary, which is used accurately and appropriately.

Grammatical Range & Accuracy (9): The report is grammatically accurate and uses a variety of sentence structures effectively.

Model Answer #2

Response:

The graph illustrates the number of participants engaged in various activities at a social centre in Melbourne, Australia, over a two-decade period from 2000 to 2020.

Overall, the film club consistently attracted the highest number of participants, while the popularity of amateur dramatics saw a significant decline. Conversely, table tennis experienced a notable resurgence in participation toward the latter part of the period.

In 2000, the film club commenced with 67 participants, and this figure remained relatively stable, culminating at 67 participants once again in 2020. Martial arts exhibited modest fluctuations, starting with 45 participants in 2000 and experiencing a gradual decline to 36 by 2020. Amateur dramatics, which began with 34 participants, witnessed a steep drop, plummeting to merely 11 participants over the two decades. This decline marks a stark contrast to the initial interest in this activity, highlighting a diminishing public engagement.

In contrast, table tennis displayed a remarkable upward trend, starting from 27 participants in 2000, peaking at 46 by 2020 after experiencing a dip mid-decade. Similarly, the activity of musical performances, which was introduced in 2005, fluctuated from 18 participants to a total of 21 by 2020, despite earlier growth. Thus, while the film club maintained its popularity, other activities like table tennis showed an increase, and amateur dramatics suffered a marked decline in public interest over the specified timeframe.

Evaluation:

Overall Band Score: 9

Task Response (9): Excellent response to the task. All key features are identified and discussed, with relevant comparisons made.

Coherence & Cohesion (9): The report is very well-structured and easy to follow. Paragraphing is clear and logical, and the flow of ideas is smooth and natural.

Lexical Resource (9): A wide range of vocabulary is used accurately and appropriately, with a sophisticated and natural control of lexical features.

Grammatical Range & Accuracy (9): The report demonstrates a wide range of grammatical structures used with complete accuracy and fluency. Punctuation is used correctly throughout.

Model Answer #3

Response:

The presented graph illustrates the trends in participant numbers for various activities at a social centre in Melbourne, Australia, spanning from 2000 to 2020.

Overall, the data indicates a marked fluctuation in participation across the activities, with notable distinctions in trends that reflect shifting interests over the two decades.

The film club consistently attracted the highest number of participants throughout the period, starting with 67 participants in 2000, experiencing a slight decline to 59 in 2010, before rebounding to 67 participants by 2020. In contrast, martial arts exhibited a gradual decline over the years, commencing with 45 participants in 2000 and diminishing to a mere 36 by the end of the observation period. While table tennis demonstrated an initial low attendance of 27 in 2000, it experienced a notable resurgence, culminating at 46 participants in 2020, making it the second most popular activity in the latest data collection. Meanwhile, amateur dramatics started with a reasonable 34 participants but suffered a stark decline, ultimately attracting only 11 attendees by 2020.

Musical performances present a compelling narrative, as they were introduced around 2005 and have since seen an upward trajectory in participation, beginning with 18 participants and peaking at 36 in 2015, followed by a slight decrease to 21 in 2020. This upward trend highlights a growing interest in musical activities over the years. In juxtaposition, the decline of amateur dramatics is significant, as it transitioned from a leading position in 2000 to the least attended activity by the end of the period. This contrast underscores a shift in participant preferences, with a clear movement away from traditional theatre activities towards either cinematic engagements or the burgeoning popularity of table tennis and musical performances.

Evaluation:

Overall Band Score: 9

Task Response (9): Excellent response to the task. All key features are identified and compared effectively.

Coherence & Cohesion (9): The report is very well-structured and easy to follow. The ideas are logically connected and flow smoothly.

Lexical Resource (9): A wide range of vocabulary is used accurately and appropriately. The language is sophisticated and natural.

Grammatical Range & Accuracy (9): The report demonstrates a wide range of grammatical structures with complete accuracy and control.

Model Answer #4

Response:

The line graph illustrates the number of participants in different social activities at a social center in Melbourne, Australia, from 2000 to 2020. Overall, the participation in the film club and martial arts activities remained stable, while there was an increase in the number of participants in table tennis and musical performances. In contrast, the number of participants in amateur dramatics experienced a significant decline in recent years.

The number of participants in the film club was consistently higher than in martial arts, and both activities showed little variation from 2000 to 2020. Specifically, the film club maintained around 60 participants, while martial arts fluctuated slightly around the 30-participant mark.

Table tennis and musical performances, on the other hand, saw notable increases. In 2010, the number of participants in table tennis and musical performances rose to nearly 60 and 20, respectively. Conversely, the number of participants in amateur dramatics fell sharply, dropping from 30 participants in 2005 to less than 10 in 2020.

In conclusion, the film club and martial arts activities remained relatively unchanged in terms of participation, whereas table tennis and musical performances gained popularity over the period. Amateur dramatics, however, saw a significant decrease in participant numbers.

Evaluation:

Overall Band Score: 9

Task Response (9): The report provides a clear and accurate summary of the main features of the graph, making relevant comparisons and addressing all aspects of the task.

Coherence & Cohesion (9): The report is well-structured and logically organized, with smooth transitions between paragraphs and ideas. The flow of information is effortless to follow.

Lexical Resource (8.5): The report demonstrates a wide range of vocabulary, using precise and sophisticated language to describe the trends and comparisons. The lexical choices are accurate and appropriate.

Grammatical Range & Accuracy (9): The report exhibits a wide range of grammatical structures, used with accuracy and fluency. The grammar and punctuation are flawless.

Model Answer #5

Response:

The graph delineates how many individuals were engaged in various social activities in a particular city in Australia between 2000 and 2020.

Looking from an overall perspective, it is readily apparent that there were increases in the participation data for those engaging in musical performances and table tennis, a decline in amateur dramatics, and negligible alterations in film club and martial arts from 2000 to 2020. Film club was by far the most popular activity over the period in question.

In 2000, the number for total participants in film club dominated other categories by a wide margin (around 64 attendees), with martial arts trailing significantly at 36. The former figure then fell slightly to hit a trough of 61 in 2010, before recovering to end at 66 in 2020, while the latter fluctuated from a low of 31 to a high of 39 prior to finishing at roughly 35.

In contrast, the statistics for amateur actors and table tennis players were less pronounced, representing about 26 and 17 participants, respectively. Over the following years, there was generally less interest in amateur dramatics, with its figure reaching a peak of 29 and thereafter plummeting to 7 in 2020, whereas table tennis grew in popularity, with its data rising marginally to 20 in 2010, followed by a surge to surpass both amateur dramatics and martial arts and reach 54 in 2020. Musical performances only started to gain members consistently in 2005 and continued this trend until 2020, plateauing near 20 attendees.

Evaluation:

Overall Band Score: 9

Task Response (9): The report provides a comprehensive and accurate summary of the main features of the graph, making relevant comparisons between the activities.

Coherence & Cohesion (9): The report is well-structured and easy to follow. The information is presented logically and coherently, with smooth transitions between paragraphs and sentences.

Lexical Resource (9): The report demonstrates a wide range of vocabulary, using precise and sophisticated language to describe the trends and comparisons.

Grammatical Range & Accuracy (9): The report displays a wide range of grammatical structures, used accurately and appropriately throughout. The punctuation is also accurate and contributes to the clarity of the report.
