

Task 1: Bar Chart

Subject: The chart below shows the results survey about people's coffee and tea buying and drinking habits in five Australian cities.

Model Answer #1

Response:

The bar graph displays the data collected in a survey about the coffee and tea buying and drinking habits of residents in five cities in Australia in the last four weeks.

Overall, in all the cities except Adelaide, more people went to a cafe for coffee or tea than bought instant or fresh coffee. In Adelaide, going to a cafe and buying instant coffee were almost equally common.

Most residents in Melbourne, Hobart, Sydney, and Brisbane visited a cafe for coffee or tea, at approximately 64%, 63%, 62%, and 55% respectively, whereas just under half of residents in Adelaide did so. These five cities also had roughly half of residents purchasing instant coffee, and the figures in Hobart and Brisbane were almost 55%.

In comparison, the proportion of people who bought fresh coffee was never as high as 45% in any of the five cities, with those in Brisbane and Adelaide, both at nearly 35%, less likely than those in the other three cities to do so.

Evaluation:

Overall Band Score: 9

Task Response (9): The report provides a clear and accurate overview of the data presented in the chart. It effectively addresses all aspects of the task.

Coherence & Cohesion (9): The report is well-organized and easy to follow. The paragraphs are logically structured and flow smoothly from one to the next.

Lexical Resource (8.5): The report demonstrates a wide range of vocabulary, using precise and appropriate language to describe the data. The language is sophisticated and natural.

Grammatical Range & Accuracy (9): The report is grammatically accurate and uses a variety of sentence structures effectively. Punctuation is used correctly throughout.

Model Answer #2

Response:

The bar graph provides information about the proportion of Australian citizens who bought tea and coffee with different drinking habits in the last 4 weeks in five cities.

Overall, enjoying coffee or tea at a cafe reigns supreme in popularity while drinking fresh coffee is the least chosen option in all cities. When comparing between purchasing instant coffee and drinking coffee or tea at a coffee shop, Adelaide shows an insignificant difference in the portion.

In Sydney, a majority of residents are interested in going to a cafe to enjoy coffee or tea, over 60% of the population, which is about 15% higher than the figure for buying instant coffee and fresh coffee. Mirroring the same trend, Melbourne has around 63%, 47%, and 42% of its citizens choosing to buy fresh coffee, instant coffee, and coffee or tea at a coffee shop, respectively. Similarly, the most common drinking habit among Hobart residents is coffee or tea at a cafe, with the figure close to Melbourne. However, the percentage of instant coffee buyers in Hobart outweighs the previous cities, with roughly 55%, while the figure for fresh coffee is only approximately 38%.

Brisbane and Adelaide both indicate insignificant gaps between drinking instant coffee and coffee or tea from a cafe. Around 55% of people in Brisbane go to coffee shops to buy coffee or tea, which is unremarkably higher than those who drink instant coffee, about 53%. Fresh coffee is almost half the figure of the other habits in Brisbane, which is the same as in Adelaide. Strikingly, both instant coffee and coffee at a cafe are chosen by around 50% of people in Adelaide, featuring little to no difference.

Evaluation:

Overall Band Score: 9

Task Response (9): The report provides a comprehensive and accurate summary of the main features of the chart, making relevant comparisons between the cities.

Coherence & Cohesion (9): The report is well-organized and easy to follow. The information is presented logically and smoothly, with clear transitions between paragraphs and sentences.

Lexical Resource (8.5): The report demonstrates a wide range of vocabulary, using precise and sophisticated language to describe the data. The language is natural and appropriate for the task.

Grammatical Range & Accuracy (9): The report is grammatically accurate and uses a variety of sentence structures effectively. Punctuation is used correctly throughout.

Model Answer #3

Response:

The provided bar chart presents data on the coffee and tea buying and drinking behaviors of residents in five major Australian cities, based on a recent survey.

Overall, there was a notable preference for consuming coffee and tea at cafes in all cities except Adelaide, where instant coffee was favored. The least common habit across all cities was purchasing fresh coffee. Melbourne and Hobart stood out with the highest percentage of cafe-goers among the five cities, while Brisbane and Sydney followed closely. Adelaide had the lowest preference for coffee or tea outside and the lowest percentage of residents buying fresh coffee.

Melbourne and Hobart boasted the highest percentage of cafe patrons at approximately 64%, with Sydney and Brisbane trailing at around 61% and 56%, respectively. In contrast, Adelaide had just under 45% of residents opting for coffee or tea at cafes, significantly lower than the other cities. The purchase of fresh coffee was below 45% across all cities, with Brisbane and Adelaide recording the lowest figures at slightly under 35%.

Hobart led in the purchase of instant coffee with the highest percentage, closely followed by Brisbane at around 54% and 53%, respectively. In the remaining cities, less than half of the population bought instant coffee, indicating a lower preference for this option compared to fresh coffee and cafe visits.

Evaluation:

Overall Band Score: 9

Task Response (9): The report provides a comprehensive and accurate summary of the main features of the chart, making relevant comparisons between the cities. It effectively highlights the key trends and patterns in coffee and tea consumption habits.

Coherence & Cohesion (9): The report is well-structured and logically organized, with clear transitions between paragraphs and ideas. The information flows smoothly and effortlessly, making it easy for the reader to follow.

Lexical Resource (8.5): The report demonstrates a wide range of vocabulary, using precise and appropriate language to describe the data. The language is sophisticated and natural, with no signs of repetition or redundancy.

Grammatical Range & Accuracy (9): The report exhibits a wide range of grammatical structures, used accurately and flexibly. The sentences are varied and complex, demonstrating a high level of grammatical control.

Model Answer #4

Response:

The bar chart provided illustrates the drinking and purchasing habits of citizens in five cities in Australia concerning coffee and tea, based on a recent survey.

Overall, there was a significantly higher preference for consuming coffee and tea at coffeehouses in all cities except for Adelaide, where the majority preferred instant coffee. Moreover, the least popular habit among the three was purchasing freshly ground coffee.

Melbourne and Hobart had the highest percentage of cafe-goers among all five cities, with around 64%, followed by Sydney and Brisbane at approximately 61% and 56%, respectively. In contrast, in Adelaide, just under half of the residents favored having coffee or tea outside. Additionally, the percentage of those who bought fresh coffee was under 45% in all five cities, with Brisbane and Adelaide having the lowest percentages at just under 35%.

Regarding the purchase of instant coffee, Hobart had the highest percentage, closely followed by Brisbane at around 54% and 53%, respectively. In the other three cities, less than half of the population purchased instant coffee.

Evaluation:

Overall Band Score: 9

Task Response (9): The report provides a clear and accurate summary of the main features of the chart, highlighting key comparisons and trends. It demonstrates a strong understanding of the data and effectively conveys the information to the reader.

Coherence & Cohesion (9): The report is well-organized and logically structured, with clear transitions between paragraphs and ideas. The information flows smoothly and effortlessly, making it easy for the reader to follow.

Lexical Resource (8.5): The report uses a wide range of vocabulary, including precise and sophisticated terms, to describe the data and make comparisons. The language is accurate and appropriate for the task.

Grammatical Range & Accuracy (9): The report demonstrates a high level of grammatical accuracy and control. The sentences are varied and complex, and the grammar is used correctly throughout.

Model Answer #5

Response:

The provided chart delineates the outcomes of a survey aimed at examining the coffee and tea purchasing and consumption patterns of residents in five distinct Australian cities: Sydney, Melbourne, Brisbane, Adelaide, and Hobart.

In general, with the exception of Adelaide, the highest proportion of individuals in the past four weeks tended to frequent cafes for coffee and tea, indicating a contrasting trend compared to those who purchased fresh coffee.

Regarding cafe visits, the highest percentages were observed in Melbourne and Hobart, both surpassing 60%, marginally higher than Sydney, which stands at exactly 60%. Brisbane follows closely with over half, while Adelaide lags behind, contributing to nearly 40%.

For purchases of instant coffee, Hobart takes the lead with approximately 55%, closely trailed by Brisbane with a slightly lower percentage. The figures for the other cities fluctuate between just over 40% and 50%, with Adelaide standing out where this category constitutes the majority at exactly 50%.

As for fresh coffee purchases, Sydney and Melbourne exhibit the highest proportions, each surpassing 40%, while figures for the other cities range from around 32% to nearly 40%.

Evaluation:

Overall Band Score: 9

Task Response (9): The report provides a comprehensive and accurate summary of the main features of the chart, highlighting key trends and making relevant comparisons. It effectively addresses all aspects of the task.

Coherence & Cohesion (9): The report is well-structured and logically organized, with clear transitions between paragraphs and ideas. The information flows smoothly and effortlessly, making it easy to follow.

Lexical Resource (9): The report demonstrates a wide range of vocabulary, using precise and sophisticated language to describe the data. The choice of words is appropriate and effective, enhancing the clarity and impact of the report.

Grammatical Range & Accuracy (9): The report exhibits a high level of grammatical accuracy and fluency. The use of complex sentence structures and varied grammatical features is impressive, contributing to the overall quality of the writing.
