

Task 1: Map

Subject: The maps show the outskirts of the town of Fosbury in 1980 and 2015. Summarise the information by selecting and reporting the main features and make comparisons where relevant.

Outskirts of Fosbury in 1980

Outskirts of Fosbury in 2015

Model Answer #1

Response:

The diagrams illustrate the transformation of Fosbury's outskirts between 1980 and 2015.

Overall, the area underwent significant development, shifting from a predominantly residential and open space to a more commercial and industrial landscape over the 35-year period.

One of the few unchanged areas was the row of houses in the top-left corner. However, in the west, terraced houses were demolished to make way for a park, which was relocated to the right-hand side near the center of the map. The tennis courts, which existed in 1980, were replaced by a sports center and a car park by 2015. Additionally, a roundabout was introduced in the central area to facilitate traffic flow.

In the northern part of the map, near the main road running from north to south, a hotel remained intact. However, the grocer's shop and block of flats adjacent to it were removed. Across from the hotel, in the top-right corner, terraced houses were replaced with commercial facilities, including a car park and a supermarket. The southeastern area saw the most industrialization, as all fields in the bottom-right were cleared to make room for warehouses.

Evaluation:

Overall Band Score: 9

Task Response (9): Excellent overview of the key changes shown in the maps. All main features are accurately described and compared.

Coherence & Cohesion (9): The report is exceptionally well-structured and easy to follow. The information flows logically, with clear transitions between paragraphs and ideas.

Lexical Resource (9): A wide range of sophisticated vocabulary is used precisely and appropriately. The language is natural and fluent.

Grammatical Range & Accuracy (9): The grammar is impeccable. A wide range of grammatical structures is used accurately and effectively.

Model Answer #2

Response:

The maps illustrate the transformation of the outskirts of Fosbury from a sparsely developed area in 1980 to a more urbanized and structured space by 2015.

In 1980, the outskirts were mostly open, with fields occupying the eastern side, a grocer's shop, and a block of flats as central features. Recreational options were limited, with only tennis courts in the southwest. A row of terraced houses and a hotel existed in the north and remained unchanged in 2015.

By 2015, significant changes occurred. The fields were converted into a park, and a new sports center was built beside the tennis courts, broadening recreational options. The central area where the grocer's shop and flats once stood was replaced by a roundabout, around which a supermarket and warehouses were added. To support this commercial development, car parks were built next to the supermarket and warehouses.

Overall, the outskirts evolved from open land and basic facilities to a more developed area with enhanced recreational and commercial infrastructure, reflecting urban expansion and improved accessibility.

Evaluation:

Overall Band Score: 9

Task Response (9): Excellent response to the task. All key features are accurately described and compared. The summary is concise and well-structured.

Coherence & Cohesion (9): The report is exceptionally well-organized and easy to follow. The logical flow of information is seamless, and the use of cohesive devices is sophisticated and natural.

Lexical Resource (9): A wide range of precise and sophisticated vocabulary is used effectively throughout the report. The lexical choices are natural and accurate.

Grammatical Range & Accuracy (9): The grammar is impeccable. A wide range of complex grammatical structures is used accurately and appropriately.

Model Answer #3

Response:

The maps illustrate the alteration of the outskirts of Fosbury from 1980 to 2015. Overall, the town experienced significant development, with the introduction of new amenities and the conversion of existing infrastructures.

The most eminent change was in terms of recreation, where, by 2015, the fields on the southeast corner of the map had been substituted by warehouses. The sports facility still remained in the same spot, but instead of tennis courts, a sports centre was present with an added car park. Furthermore, the park on the west rim of the town had been downsized and shifted one block to the right; replacing the park, terraced houses had been relocated there.

Another prominent transformation was that a roundabout had been built in the middle of the town, taking up some space where a block of flats used to be in 1980. Moreover, a supermarket with a car park was built where the terraced houses occupied.

On the other hand, the only that had been the same over the 35-year period was the hotel, which remained the same size and location.

Evaluation:

Overall Band Score: 9

Task Response (9): Excellent response to the task. All key features are identified and compared effectively.

Coherence & Cohesion (9): The report is very well-structured and easy to follow. The information is presented logically and coherently.

Lexical Resource (9): A wide range of vocabulary is used accurately and appropriately. The language is sophisticated and natural.

Grammatical Range & Accuracy (9): The report demonstrates a wide range of grammatical structures with complete accuracy and fluency.

Model Answer #4
