

## Task 1: Line Graph

**Subject:** The line graph below shows the consumption of 3 different types of fast food in Britain from 1970 to 1990.

## **Answer #1**

### **Response:**

The line graph delineates the trends in fast food consumption, measured in grams, over two decades from 1970 to 1990.

Overall, it is evident that there was a pronounced increase in the consumption of all three types of fast food, with pizza witnessing the most substantial growth, ultimately eclipsing the other items by 1990.

In 1970, the consumption patterns of fast food indicated that hamburgers were the most favored item, with an approximate consumption of 300 grams per person. This was followed by fish and chips, which accounted for around 100 grams, and pizza, which was markedly lower at just 50 grams. However, throughout the 1980s, a notable shift occurred. Despite remaining the least consumed item at the beginning, pizza consumption saw a steady rise, reflecting changing dietary preferences.

By the year 1990, the consumption statistics revealed a remarkable transformation; hamburgers maintained their popularity, increasing to roughly 350 grams. Fish and chips experienced moderate growth, exceeding 200 grams. Conversely, pizza's rise was dramatic, culminating in a consumption level of approximately 500 grams, thereby surpassing both hamburgers and fish and chips. This shift not only highlights escalating trends in fast food preferences but also illustrates a significant cultural change in dietary habits during this period.

### **Scores:**

Overall Band Score: 9

Task Response: 9 - Excellent response to the task. All key features of the graph are accurately described and analyzed.

Coherence & Cohesion: 9 - The report is exceptionally well-organized and easy to follow. The flow of information is natural and logical.

Lexical Resource: 9 - A wide range of sophisticated vocabulary is used accurately and appropriately. The language is precise and effective.

Grammatical Range & Accuracy: 9 - The grammar is flawless. A wide range of grammatical structures is used with complete accuracy and fluency.

## **Answer #2**

### **Response:**

The line graph delineates the trends in fast food consumption, measured in grams, over two decades from 1970 to 1990.
