

Task 1: Map

Subject: The map below shows the village of Stokeford in 1930 and 2010. Summarize the information by selecting and reporting the main features, and make comparisons where relevant.

The maps below show the village of Stokeford in 1930 and 2010.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

Answer #1

Response:

The maps above illustrate the transformation of the village in Stokeford between 1930 and 2010. Over these 80 years, Stokeford changed a lot, moving from a small farming village to a bigger residential area.

In 1930, Stokeford was a rural village with lots of farmland, which is located in the southern part. There were a few houses along the main road, a primary school, a post office, some shops, and a large house with gardens.

By 2010, the village had grown a lot. Many new houses were built, especially in the areas that used to be farmland. The village layout became more structured, and roads were extended to accommodate new settlements. The large house with gardens was replaced by a retirement home. The primary school and post office stayed in the same place, but the shops disappeared.

Overall, Stokeford changed from a farming village to a bigger residential area with more houses and new facilities like the retirement home. The village became more urbanised and less focused on farming.

Scores:

Overall Band Score: 9

Task Response: 9 - Excellent response to the task. All key features are accurately identified and compared.

Coherence & Cohesion: 9 - The report is very well-organized and easy to follow. The information is presented in a logical and coherent manner.

Lexical Resource: 9 - A wide range of vocabulary is used accurately and appropriately. The language is sophisticated and natural.

Grammatical Range & Accuracy: 9 - The report demonstrates a wide range of grammatical structures with complete accuracy and fluency.

Answer #2

Response:

The maps provide a comparison between the village of Stokeford in 1930 and 2010, showcasing the changes in its layout and infrastructure over this time period.

Overall, while the northern and western parts of Stokeford remained largely unchanged, significant alterations in housing and amenities took place in other areas.

In 2010, the bridge area remained consistent with its 1930 counterpart. To the southeast of the bridge, farmland was replaced with two housing developments, and a new road was constructed between them. Moving towards the west, the shops were replaced to make room for additional residences. Adjacent to the eastern housing developments, the primary school was expanded.

Further southeast, the large house was transformed into a 'retirement home,' with a reduction in its surrounding garden space. At the southern end, another farmland near the River Stoke was converted to residential plots.

Furthermore, a notable shift was the relocation of the post office and primary school to a new centralized location. The original shops were removed entirely, and the area previously occupied by a single large house and gardens was repurposed for a retirement home. The farmland areas in 1930 were progressively transformed into housing plots by 2010, reflecting the increased demand for residential spaces in Stokeford.

Scores:

Overall Band Score: 9

Task Response: 9 - Excellent response to the task. All key features are identified and compared effectively.

Coherence & Cohesion: 9 - The report is very well-organized and easy to follow. The information is presented logically and coherently.

Lexical Resource: 9 - A wide range of vocabulary is used accurately and appropriately. The language is sophisticated and natural.

Grammatical Range & Accuracy: 9 - The report demonstrates a wide range of grammatical structures with complete accuracy and fluency.

Answer #3

Response:

The given maps illustrate the changes that occurred in the village of Stokeford between 1930 and 2010.

Overall, while the northern and western parts of Stokeford remained unaltered over time, considerable transformations in housing and amenities took place in other areas.

In 2010, the bridge in Stokeford remained consistent with its 1930 design, whereas significant alterations were evident in the vicinity. To the south-east of the bridge, farmland was replaced with rows of residential buildings, and a new road was established between them. Moving westwards, the shops from 1930 were replaced with additional houses. Adjacent to the eastern row of houses, the primary school underwent an expansion. Furthermore, the large house to the southeast was converted into a retirement home, which was then expanded, resulting in a reduced garden area. Additionally, to the south-east near River Stoke, more farmland was repurposed to accommodate the growing housing needs.

The alterations in Stokeford's layout are particularly noticeable in the southern and eastern regions, indicating a shift towards residential development and modernization of amenities. While the road layout in the northern and western parts maintained continuity, the southern part saw a significant increase in housing infrastructure. The relocation of the primary school and post office to a centralized location along with the conversion of the large house into a retirement home reflect the evolving needs of the village's inhabitants. The conversion of farmland into residential plots further demonstrates the urban expansion and population growth in Stokeford between 1930 and 2010.

Scores:

Overall Band Score: 9

Task Response: 9 - Excellent response to the task. All key features are identified and compared effectively.

Coherence & Cohesion: 9 - The report is very well-structured and easy to follow. The information is presented logically and coherently.

Lexical Resource: 9 - A wide range of vocabulary is used accurately and appropriately. The language is sophisticated and natural.

Grammatical Range & Accuracy: 9 - The report demonstrates a wide range of grammatical structures with complete accuracy and fluency.

Answer #4

Response:

The maps above illustrate the transformation of Stokeford village between 1930 and 2010. Overall, while the village of Stokeford has undergone significant changes between 1930 and 2010, some features have remained the same.

In the northern part of the village, the only bridge across the River Stokeford remains unchanged. Adjacent to the bridge, the main street runs south through the village. In 1930, the street was lined with houses on the west and farmland on the east. However, by 2010, the shops and farmland had given way to a branch street with houses.

Furthermore, the farmland south of the post office and the garden opposite it in 1930 were replaced by houses and a retirement home, respectively, by 2010.

Notably, some features of the village have remained similar to their 1930 counterparts. The post office, located beneath the shops, and the primary school, situated opposite the post office, have retained their original layout.

In conclusion, while Stokeford village has undergone significant transformations over 80 years, some areas have been preserved.

Scores:

Overall Band Score: 9

Task Response: 9 - The report accurately summarizes the main features of the maps and makes relevant comparisons between the two time periods. The writer has successfully identified the key changes and similarities between the 1930 and 2010 maps.

Coherence & Cohesion: 9 - The report is extremely well-organized and easy to follow. The writer has used cohesive devices effectively to link ideas between sentences and paragraphs, making the text cohesive and fluent.

Lexical Resource: 9 - The writer has demonstrated a wide range of vocabulary, using precise and accurate language to describe the features of the maps. The use of synonyms, such as 'transformation' and 'unchanged', adds to the report's lexical sophistication.

Grammatical Range & Accuracy: 9 - The writer has demonstrated a high level of grammatical control, using a range of sentence structures and verb tenses accurately and appropriately. Punctuation is also used correctly throughout the report.
