

# Task 1: Multiple Graphs

**Subject:** The chart below show the changes in ownership of electrical appliances and amount of time spent doing housework in households in one country between 1920 and 2019.

## **Model Answer #1**

### **Response:**

The provided charts illustrate the trends in the ownership of electrical appliances and the amount of time spent on housework in households in a particular country from 1920 to 2019.

Overall, there has been a substantial increase in the ownership of electrical appliances, such as washing machines, refrigerators, vacuum cleaners, and electric irons, over the past century. Concurrently, the amount of time spent on housework has steadily decreased throughout the same period, reflecting a shift towards greater efficiency in household tasks.

In terms of appliance ownership, there has been a significant transformation. In 1920, none of the households owned washing machines, refrigerators, vacuum cleaners, or electric irons. However, by 2019, the situation had changed drastically, with every household (100%) possessing both washing machines and refrigerators. Vacuum cleaners and electric irons also saw substantial increases in ownership, reaching 80% and 70% respectively by 2019.

On the other hand, the amount of time spent on housework per week has shown a consistent decline. In 1920, households typically dedicated an average of 50 hours per week to housework. However, this figure decreased steadily, dropping to under 5 hours per week by 2019. This sharp decline reflects the growing role of electrical appliances in reducing the time required for domestic chores.

In conclusion, the data highlights a clear link between the rise in ownership of electrical appliances and the reduction in time spent on housework. Over the course of a century, technological advancements have significantly transformed household dynamics, contributing to a more efficient and convenient domestic environment.

### **Evaluation:**

#### **Overall Band Score: 9**

**Task Response (9):** Excellent response to the task. All key features of the visual information are accurately described and compared.

**Coherence & Cohesion (9):** The report is exceptionally well-organized and easy to follow. The logical flow of ideas is seamless.

**Lexical Resource (8.5):** A wide range of sophisticated vocabulary is used precisely and naturally. The lexical choices enhance the clarity and impact of the report.

**Grammatical Range & Accuracy (9):** The grammar is flawless. A wide range of grammatical structures is used accurately and appropriately.

## **Model Answer #2**

### **Response:**
