

Task 1: Pie Chart

Subject: The charts show projections for global production by sector in 2040 and 2060. Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Model Answer #1

Response:

The two pie charts illustrate the projected global production by sector for the years 2040 and 2060.

Overall, the services and manufacturing sectors are anticipated to contribute the largest share to global production in both years, accounting for approximately 71% in 2040 and 74% in 2060. In contrast, materials, energy, agriculture, and information-communication technology are projected to constitute smaller proportions of the total global output.

Looking at the specific changes, the services sector is expected to slightly increase its share from 40% in 2040 to 41% in 2060. Similarly, the manufacturing sector is predicted to see a modest rise from 31% to 33% over the same period. The proportions of materials and information-communication technology are also projected to increase marginally, from 3% to 4% and from 15% to 16%, respectively.

In contrast, the energy sector is forecast to experience a slight decline in its contribution to global production, decreasing from 7% in 2040 to 5% in 2060. The agriculture sector is anticipated to see the most significant decrease, dropping from 4% in 2040 to just 1% in 2060. Notably, by 2060, the combined projected output of the energy and agriculture sectors (6%) is only slightly higher than that of the materials sector (4%).

Evaluation:

Overall Band Score: 9

Task Response (9): The report provides a comprehensive summary of the main features and comparisons in the charts. All key aspects are covered accurately and effectively.

Coherence & Cohesion (9): The report is exceptionally well-organized and easy to follow. The logical flow of information and use of cohesive devices are seamless.

Lexical Resource (8.5): A wide range of sophisticated vocabulary is used precisely and appropriately. The lexical choices enhance the clarity and impact of the report.

Grammatical Range & Accuracy (9): The report demonstrates a wide range of grammatical structures with complete accuracy and fluency. The writing is grammatically impeccable.

Model Answer #2

Response:

The provided pie charts illustrate the anticipated global production distribution across various sectors for the years 2040 and 2060.

Overall, it is evident that the Services and Manufacturing sectors are projected to maintain their dominance in global production, while the Energy sector is expected to experience a decline by 2060.

In 2040, the Services sector is forecasted to account for 40% of global production, maintaining a slight increase to 41% by 2060. Concurrently, the Manufacturing sector is projected to rise from 31% in 2040 to 33% in 2060. The Materials sector is anticipated to have a modest growth, increasing from 15% to 16% during the same period. Both Services and Manufacturing demonstrate a steady upward trajectory, indicating their significant roles in the global economy as time progresses.

In contrast, the Energy sector is predicted to decline notably from 7% in 2040 to 4% in 2060. This reduction marks a significant shift in focus away from energy production. Agricultural production is expected to experience a modest growth, improving from 4% in 2040 to 5% in 2060. Additionally, the Info-Com Tech sector is projected to decline sharply from 3% in 2040 to just 1% by 2060. These trends indicate a shifting landscape in which traditional energy sources may be supplanted by services and manufacturing as dominant forces in the global production sector.

Evaluation:

Overall Band Score: 9

Task Response (9): Excellent response to the task. All key features are accurately described and compared.

Coherence & Cohesion (9): The report is exceptionally well-organized and easy to follow. The flow of information is natural and logical.

Lexical Resource (8.5): A wide range of sophisticated vocabulary is used accurately and appropriately. The language is precise and effective.

Grammatical Range & Accuracy (9): The grammar is flawless. A wide range of grammatical structures is used with complete accuracy and fluency.

Model Answer #3

Response:

The two pie charts illustrate the projected global production by sector for the years 2040 and 2060.

Overall, the services and manufacturing sectors are anticipated to contribute the largest share to global production in both years, accounting for approximately 71% in 2040 and 74% in 2060. In contrast, materials, energy, agriculture, and information-communication technology are projected to constitute smaller proportions of the total global output.

Looking at the specific changes, the services sector is expected to slightly increase its share from 40% in 2040 to 41% in 2060.
