

Task 1: Pie Chart

Subject: The charts below show the percentage of water used for different purposes in six areas of the world.

Model Answer #1

Response:

The pie charts display the percentage of water used for agricultural, industrial, and domestic purposes across six regions of the world.

Agricultural use dominates in most regions, particularly in Central Asia and Africa, where 88% and 84% of water are allocated to agriculture, respectively. Similarly, South East Asia also shows a significant focus on agricultural activities, with 81% of water utilized for this purpose. In South America, 71% of water is directed toward agriculture, while domestic use accounts for 19%, and industrial use makes up just 10%.

Conversely, in North America and Europe, industrial use takes precedence. In North America, 48% of water is used for industrial purposes, followed by agriculture at 39%, and domestic use at 13%. Europe shows a similar trend, with 53% of water allocated to industrial activities, 32% for agriculture, and 15% for domestic use.

Overall, the data indicate significant regional variation, with agriculture being the primary water consumer in developing regions and industrial use dominating in more developed regions.

Evaluation:

Overall Band Score: 9

Task Response (9): Excellent overview of the data. All key features are accurately described and compared.

Coherence & Cohesion (9): The report is exceptionally well-structured and easy to follow. The flow of information is natural and logical.

Lexical Resource (8.5): A wide range of sophisticated vocabulary is used accurately and appropriately. The language is precise and effective.

Grammatical Range & Accuracy (9): The grammar is flawless. A wide range of grammatical structures is used with complete accuracy and fluency.

Model Answer #2

Response:

The pie charts display the percentage of water used for agricultural, industrial, and domestic purposes across six regions of the world.

Agricultural use dominates in most regions, particularly in Central Asia and Africa, where 88% and 84% of water are allocated to agriculture, respectively. Model Answer #3

Response:

The charts illustrate the percentage of water used for various purposes in six regions of the world.

Overall, there are three sectors in which water is utilized. Agricultural use accounts for the majority in four out of the six regions. Among the other two purposes, industrial usage is highest in two areas, while in the remaining regions, there is a close competition between domestic and industrial usage.

In the four areas where the majority of water is allocated for agricultural purposes, it can be said that these regions are largely dependent on agriculture. Central Asia has the highest percentage at 88%. The other two regions exceeding 80% are Africa and Southeast Asia, with percentages of 84% and 81% respectively. The lowest percentage is found in South America, which stands at 71%.

Regarding the other two sectors, industrial usage accounts for 53% in Europe and nearly half of the total in North America. Southeast Asia also has significant industrial usage at 12%. For domestic use, the percentages are higher in South America and Africa at 19% and 9% respectively. The lowest amount of industrial use is 5% in Central Asia, while domestic use is at 7% in both Central Asia and Southeast Asia.

Evaluation:

Overall Band Score: 9

Task Response (9): The report provides a comprehensive and accurate overview of the data presented in the charts. All key features are identified and discussed in detail.

Coherence & Cohesion (9): The report is well-structured and logically organized. The information flows smoothly and effortlessly, with clear transitions between paragraphs and ideas.

Lexical Resource (8.5): The report demonstrates a wide range of vocabulary, using precise and sophisticated language to describe the data. The language is natural and appropriate for the task.

Grammatical Range & Accuracy (9): The report exhibits a wide range of grammatical structures, used accurately and with complete control. The grammar and punctuation are flawless.
