

## Task 1: Bar Chart

**Subject:** Writing Task 1 You should spend about 20 minutes on this task. The bar chart shows a comparison of the daily routines of school pupils between three countries. Summarise the information by selecting and reporting the main features and make comparisons where relevant. Write at least 150 words.

## **Answer #1**

### **Response:**

The bar chart presents a comparative analysis of the daily routines of school pupils across three nations: the United States, Australia, and Canada.

Overall, it is evident that Australian students allocate a disproportionately high amount of time to studying, while students from Canada and the United States exhibit more balanced daily routines between sleeping, studying, and relaxing.

In terms of study time, Australian pupils dedicate a striking 13 hours per day to their academic activities, significantly overshadowing the 8 hours allocated by their American counterparts and the 8 hours also recorded for Canadian students. This substantial commitment to study in Australia is accompanied by a marked reduction in relaxation time, where students only engage in restful activities for 4 hours daily, in stark contrast to the 7.5 hours observed for both the United States and Canada.

Regarding sleep, Canadian and American students demonstrate comparable patterns, with 8 and 8.5 hours dedicated to sleep, respectively. Conversely, Australian students exhibit a lesser sleeping duration of 7.5 hours. This divergence in sleeping patterns further highlights the emphasis placed on studying in Australia compared to the more balanced lifestyle enjoyed by students in the United States and Canada.

### **Scores:**

Overall Band Score: 9

Task Response: 9 - Excellent response to the task. All key features of the chart are accurately described and compared.

Coherence & Cohesion: 9 - The report is exceptionally well-organized and easy to follow. The flow of information is natural and logical.

Lexical Resource: 8.5 - A wide range of sophisticated vocabulary is used accurately and appropriately. The language is precise and effective.

Grammatical Range & Accuracy: 9 - The grammar is flawless. A wide range of grammatical structures is used with complete accuracy and fluency.

## **Answer #2**

### **Response:**

The bar chart illustrates how students from three different nations, namely the United States, Australia, and Canada, spend their 24 hour time period on a typical weekday. Overall, Australia prioritises studying over relaxing and sleeping, whereas Canada and the United States devote almost equal amounts of time to studying, sleeping, and relaxing. In regards to studying, children in Australia spend an average of 13 hours a day on studies, which is 5 hours and 4.5 hours longer than students in the United States and Canada, respectively. Furthermore, students in the United States and Canada devote an equal number of 7.5 hours per day to relaxing, whereas Australian kids set aside only 4 hours a day for relaxation. When it comes to sleeping, kids in the United States spend the most time in bed, averaging 8.5 hours a day. However, Canada's schoolchildren are not far behind at around 8 hours, but pupils in Australia sleep for at least one hour less at 7 hours as compared to the other two nations.

### **Scores:**

Overall Band Score: 9

Task Response: 9 - The report provides a clear and accurate summary of the main features of the chart, highlighting key comparisons and trends. All relevant information is included.

Coherence & Cohesion: 9 - The report is well-organized and easy to follow. Paragraphs are used effectively to group related information, and transitions between paragraphs are smooth and logical.

Lexical Resource: 8.5 - The report demonstrates a wide range of vocabulary, using precise and appropriate words to describe the data. The language is sophisticated and natural.

Grammatical Range & Accuracy: 9 - The report is grammatically accurate and uses a variety of sentence structures effectively. Punctuation is used correctly throughout.

## **Answer #3**

### **Response:**

The bar chart illustrates how students from three different nations, namely the United States, Australia, and Canada, spend their 24 hour time period on a typical weekday. Overall, Australia prioritises studying over relaxing and sleeping, whereas Canada and the United States devote almost equal amounts of time to studying, sleeping, and relaxing. In regards to studying, children in Australia spend an average of 13 hours a day on studies, which is 5 hours and 4.5 hours longer than students in the United States and Canada, respectively. Furthermore, students in the United States and Canada devote an equal number of 7.5 hours per day to relaxing, whereas Australian kids set aside only 4 hours a day for relaxation. When it comes to sleeping, kids in the United States spend the most time in bed, averaging 8.5 hours a day. However, Canada's schoolchildren are not far behind at around 8 hours, but pupils in Australia sleep for at least one hour less at 7 hours as compared to the other two nations.

### **Scores:**

Overall Band Score: 9

Task Response: 9 - The report provides a comprehensive and accurate comparison of the daily routines of school pupils in the three countries, addressing all aspects of the task.

Coherence & Cohesion: 9 - The report is well-structured and logically organized, with clear transitions between paragraphs and ideas. The information flows smoothly and effortlessly.

Lexical Resource: 8.5 - The report demonstrates a wide range of vocabulary, using precise and sophisticated language to describe the data. The language is natural and appropriate for the academic context.

Grammatical Range & Accuracy: 9 - The report exhibits a wide range of grammatical structures, used accurately and with complete control. The grammar and punctuation are flawless.

## **Answer #4**

### **Response:**

The bar chart illustrates how students from three different nations, namely the United States, Australia, and Canada, spend their 24 hour time period on a typical weekday. Overall, Australia prioritises studying over relaxing and sleeping, whereas Canada and the United States devote almost equal amounts of time to studying, sleeping, and relaxing. In regards to studying, children in Australia spend an average of 13 hours a day on studies, which is 5 hours and 4.5 hours longer than students in the United States and Canada, respectively. Furthermore, students in the United States and Canada devote an equal number of 7.5 hours per day to relaxing, whereas Australian kids set aside only 4 hours a day for relaxation.
