

# Task 1: Map

**Subject:** The two maps below show an island, before and after the construction of some tourist facilities. Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

*The two maps below show an island, before and after the construction of some tourist facilities.*

*Summarise the information by selecting and reporting the main features, and make comparisons where relevant.*

Write at least 150 words.

## **Model Answer #1**

### **Response:**

The two maps illustrate the changes made to an island following the construction of tourist facilities. The transformation involves a shift from a largely untouched natural landscape to a developed area that accommodates tourism. The extent of these changes highlights both advantages and disadvantages.

Initially, the island featured few palm trees and was devoid of infrastructure. After development, the island underwent significant modifications with the introduction of various facilities aimed at improving the visitor experience. A pier was constructed to support marine activities, enhancing accessibility. The addition of walking paths and vehicle tracks further facilitated movement across the island, making it more tourist-friendly.

Moreover, the construction of nine accommodation units, a restaurant, and a reception area marked a strong shift toward providing necessary services for tourists. While these developments offer clear benefits, such as increased comfort and accessibility for visitors, they also bring potential downsides. The commercialization of the island could lead to environmental degradation and a loss of its natural beauty, which was initially part of its charm.

In conclusion, while the addition of tourist facilities makes the island more attractive and accessible for visitors, it also poses risks to the natural environment. Thus, I partially agree with the need for balanced development, ensuring that while tourism is supported, efforts are also made to preserve the island's natural integrity.

### **Evaluation:**

#### **Overall Band Score: 9**

**Task Response (9):** Excellent response to the task. All key features are accurately described and compared. The report is well-organized and clearly written.

**Coherence & Cohesion (9):** The report flows smoothly and logically. Paragraphing is effective, and the ideas are connected seamlessly. The language used is sophisticated and precise.

**Lexical Resource (9):** A wide range of vocabulary is used accurately and appropriately. The language is natural and sophisticated, demonstrating excellent control of lexical features.

**Grammatical Range & Accuracy (9):** The grammar is impeccable. A wide range of grammatical structures is used accurately and flexibly.

## **Model Answer #2**

### **Response:**

The two provided maps illustrate the significant changes to an island resulting from the introduction of tourist facilities.

Overall, the transformation is characterized by extensive development that has substantially altered the natural landscape into a more commercialized environment.

In the initial map, the island is depicted as predominantly natural, featuring sparse palm trees along the coastline, with no visible infrastructure or facilities. In contrast, the revised map presents an entirely different scenario with the addition of a beach that enhances recreational opportunities. Furthermore, the establishment of a pier allows for access to marine activities, while the introduction of vehicles and footpaths facilitates transportation around the island.

In addition to the recreational enhancements, the after map reveals the construction of nine accommodation units, which indicates a substantial increase in lodging capacity for visitors. Additionally, a restaurant and a reception area have been introduced, suggesting a focus on hospitality and guest services. This development reflects a clear intent to attract tourists and provide them with essential amenities, fundamentally transforming the island's function and appeal.

### **Evaluation:**

#### **Overall Band Score: 9**

**Task Response (9):** The report provides a comprehensive and accurate summary of the key changes shown in the maps. It effectively identifies and describes the main features of both maps, making relevant comparisons between the 'before' and 'after' states.

**Coherence & Cohesion (9):** The report is well-structured and logically organized. The information flows smoothly, with clear transitions between paragraphs and sentences. The use of cohesive devices enhances the overall clarity and readability.

**Lexical Resource (9):** The report demonstrates a wide range of vocabulary, using precise and appropriate language to describe the changes to the island. The choice of words is sophisticated and effectively conveys the intended meaning.

**Grammatical Range & Accuracy (9):** The report exhibits a high level of grammatical accuracy and fluency. The use of a variety of sentence structures and complex grammatical features is impressive and contributes to the overall quality of the writing.

## **Model Answer #3**

### **Response:**

The provided maps illustrate the changes to an island before and after the construction of tourist facilities. Overall, it can be seen that the transformation emphasizes a shift from a pristine environment to a developed tourist hub.

First, the island was largely undeveloped with a beach on the western side and a few palm trees scattered across the landscape. It is obvious that there are no structures or pathways, indicating a natural and untouched environment.

The second map reveals significant development. The most notable additions are the construction of a reception area near the southern part of the island and a restaurant towards the northwest. Besides, multiple accommodation units spread across the central area. Additionally, a pier has been built on the southern coast, likely for docking boats.

Moreover, to facilitate movement, footpaths and vehicle tracks have been introduced. It is apparent that footpaths connect all the accommodations to the restaurant and the reception, while vehicle tracks provide access to key areas. Despite these changes, the swimming pool remains in the same location but is now easily accessible from the new facilities by footpath.

In conclusion, the introduction of these developments has transformed the island from a natural state to a structured tourist destination with significant infrastructure to support visitors.

### **Evaluation:**

#### **Overall Band Score: 9**

**Task Response (9):** The report provides a comprehensive and accurate summary of the key changes shown in the maps. It effectively identifies and compares the main features, demonstrating a clear understanding of the task.

**Coherence & Cohesion (9):** The report is well-structured and logically organized. The information flows smoothly, with clear transitions between paragraphs and ideas. The use of cohesive devices is sophisticated and contributes to the overall clarity and coherence of the report.

**Lexical Resource (9):** The report demonstrates a wide range of vocabulary, using precise and appropriate language to describe the changes to the island. The language is sophisticated and varied, with no noticeable repetition or misuse of vocabulary.

**Grammatical Range & Accuracy (9):** The report exhibits a wide range of grammatical structures, used accurately and with flexibility. The sentences are varied and complex, demonstrating a high level of grammatical control. Punctuation is used correctly throughout.

## **Model Answer #4**

### **Response:**

The two maps illustrate the development of a previously uninhabited island after the establishment of tourist facilities.

The maps show a significant transformation of the island, with the development of a diverse tourist infrastructure, including beaches, accommodation units, and a pier, replacing the original natural landscape.

The before map reveals a pristine island dominated by a natural landscape. The coastline is sparsely populated with palm trees, indicating a lack of human activity. Additionally, the relatively small scale of the map suggests that the area was undeveloped prior to the introduction of tourist facilities.

In contrast, the after map showcases a fully developed tourist destination. Nine accommodation units have been built along the coastal perimeter, along with a restaurant, reception, and a pier. The island has also been enhanced with a designated beach area, footpaths, and a network of roads to facilitate transportation. This indicates a substantial investment in tourism infrastructure, attracting visitors and transforming the island into a major tourist attraction.

### **Evaluation:**

#### **Overall Band Score: 9**

**Task Response (9):** The report provides a comprehensive and accurate description of the changes shown in the maps, demonstrating a clear understanding of the task.

**Coherence & Cohesion (9):** The report is well-organized and flows smoothly, with clear transitions between paragraphs and ideas. The use of cohesive devices is sophisticated and effective.

**Lexical Resource (9):** The report uses a wide range of vocabulary, including precise and sophisticated terms, to describe the changes in the island. The language is accurate and appropriate for the task.

**Grammatical Range & Accuracy (9):** The report demonstrates a high level of grammatical accuracy and control. The sentences are varied and complex, and the punctuation is used correctly throughout.

## **Model Answer #5**

### **Response:**

The provided maps illustrate the transformation of an island before and after the development of tourist facilities.

Overall, the island evolved from a natural state with minimal features to a bustling tourist destination post-development.

Initially, the island was characterized by a simple landscape with a sparse distribution of palm trees along the coastline. The 'before' map illustrates the absence of any significant man-made structures, showcasing a serene and undeveloped environment. In stark contrast, the 'after' map reveals a drastic change, with the introduction of various amenities. Notably, the island now boasts a beach area, footpaths, vehicle tracks, 9 accommodations units, a restaurant, and a reception building.

Following the constructions, the island underwent a significant transformation with the addition of a pier for recreational and transport purposes, enhancing accessibility. Additionally, the establishment of swimming areas adjacent to the beach and the inclusion of two boats illustrate the enhanced recreational opportunities for tourists. The development has not only increased the aesthetic appeal of the island but also significantly enhanced its infrastructural capacity to cater to the needs of visitors.

### **Evaluation:**

#### **Overall Band Score: 9**

**Task Response (9):** The report provides a thorough summary of the main features depicted in the maps, highlighting the transformation of the island before and after the construction of tourist facilities. Relevant comparisons are made between the two states of the island, fulfilling the task requirements effectively.

**Coherence & Cohesion (9):** The report is well-structured with clear paragraphing, allowing for easy follow-through of the information. Cohesive devices are effectively used to connect ideas and maintain the flow of the report. Overall, coherence and cohesion are excellently maintained.

**Lexical Resource (9):** The report demonstrates a wide range of vocabulary used accurately and precisely. The language is sophisticated and natural, enhancing the overall quality of the report. The choice of words is appropriate, contributing to a high lexical resource score.

**Grammatical Range & Accuracy (9):** A variety of grammatical structures are employed throughout the report with full flexibility and control. There are no noticeable errors in punctuation or grammar, indicating a high level of grammatical range and accuracy.
