

## Task 1: Line Graph

**Subject:** The chart below shows the average cost of monthly contract for four different mobile (cell phones) in a European country from January to September 2002, measured in euro.

## **Model Answer #1**

### **Response:**

The graph illustrates the average monthly charges (in euros) for four different mobile phone companies from January to September 2002.

It is evident that Sim TX experienced the fastest rise in service fees, despite Domo generally having the highest prices. Lex saw a slight increase in charges, while Alpha's service costs remained mostly stable.

Domo had the highest monthly contract fees, ranging from 15 to 25 euros, with the peak occurring in July. Conversely, Sim TX offered the lowest service cost for the first six months at approximately 5 euros. It matched Alpha at 10 euros in July and surpassed Domo in September, reaching 25 euros, which was a fivefold increase from its initial fee.

Like Domo and Sim TX, Lex's charges also increased over time, but the rise was relatively modest (7 euros) compared to the other companies. In contrast, Alpha's costs remained quite stable, with a minor increase of 4 euros between May and June, before reverting to its usual level of around 10 euros per month.

### **Evaluation:**

#### **Overall Band Score: 9**

**Task Response (9):** Excellent response to the task. All key features are accurately described and analyzed.

**Coherence & Cohesion (9):** The report is exceptionally well-organized and easy to follow. The flow of information is natural and logical.

**Lexical Resource (9):** A wide range of sophisticated vocabulary is used accurately and appropriately. The language is precise and effective.

**Grammatical Range & Accuracy (9):** The grammar is flawless. A wide range of grammatical structures is used with complete accuracy and fluency.

## **Model Answer #2**

### **Response:**

The given line graph compares the average monthly expenditures of contracts for four distinct cell phones in a European country between January and September in 2002.

Overall, all brands underwent ascending trends albeit with different degrees in monthly contract expenditures, except for Sim TX, whose trend was downward since June. Notably, while Domo's figure topped the chart and Alpha's ranked last initially, Alpha overtook Domo to take the top position, whereas Sim TX ended up at the bottom of the chart in the concluding month.

From January to Jun, the relative ranks of prices among phone brands were generally stable, except that Lex and Sim TX switched positions with each other in Jun. In detail, January saw the average price of a monthly Domo contract leading at 15 pounds, followed closely by Lex at 13 pounds, while the prices of Sim TX and Alpha were substantially lower at only 9 pounds and 5 pounds, respectively. By June, the average price of Domo had increased moderately to 20 pounds, which was four times that of Alpha, whose price peaked in April before reversing to its original figure of 5 pounds. Lastly, despite both having ascending trends, Lex consistently received higher average prices compared to Sim TX with the exception of June when the latter peaked at 15 pounds, minimally surpassing Lex.

In the remaining months, Alpha overtook Domo by a narrow margin in terms of average price, Lex continued its price rise, and Sim TX underwent a moderate decline in expenditure. Specifically, Domo reached a peak of 25 pounds in July before reversing back to roughly 23 pounds in September, losing its lead to Alpha after this brand's price increased fivefold from 5 pounds in June to 25 pounds in September, becoming the phone with the highest average price monthly contract. On the other hand, Lex continued to climb to 18 pounds, being the 3rd highest phone in September. Sim TX saw a stark contrast when its average expenditure diminished to approximately 8 pounds, holding the bottom position among brands in the final month.

### **Evaluation:**

#### **Overall Band Score: 9**

**Task Response (9):** Excellent response to the task. All key features are accurately described and analyzed.

**Coherence & Cohesion (9):** The report is exceptionally well-organized and easy to follow. The flow of information is natural and logical.

**Lexical Resource (8.5):** A wide range of sophisticated vocabulary is used accurately and appropriately. The language is precise and effective.

**Grammatical Range & Accuracy (9):** The grammar is impeccable. A wide range of grammatical structures is used with complete accuracy and fluency.

## **Model Answer #3**

### **Response:**

The line graph delineates the average monthly contract costs for four distinct mobile phone brands in a European nation from January to September 2002, measured in euros.

In general, a discernible upward trend is observed in the contract prices of all brands except for Sim TX, which exhibited considerable fluctuations throughout the period. Notably, Alpha recorded the most significant increase in its contract costs.

Initially, Alpha commenced at a comparatively modest price of 5 euros in January, maintaining this figure for several months before experiencing substantial growth, culminating at 25 euros in September. Lex, on the other hand, began its trajectory at 5 euros, exhibiting a gradual increase which peaked at 15 euros in July and settled at approximately 12 euros by September. Conversely, Domo commenced with the highest initial cost of 15 euros, which surged to a peak of 25 euros in September before exhibiting a marginal decline to around 23 euros as the months progressed.

Sim TX displayed a more volatile pricing pattern, commencing at 20 euros in January; however, it experienced a notable decrease to 10 euros in July, followed by a subsequent increase peaking at 15 euros in September. This fluctuation illustrates the inconsistent market performance of Sim TX in contrast to the overall upward trajectory of the other three brands. Collectively, while all mobile brands, aside from Sim TX, demonstrated an increased cost trend, Alpha's significant rise and Domo's initial dominance reflect varying competitive dynamics within the market.

### **Evaluation:**

#### **Overall Band Score: 9**

**Task Response (9):** The report provides a comprehensive and accurate overview of the data presented in the line graph. It effectively addresses all aspects of the task, demonstrating a clear understanding of the information and its implications.

**Coherence & Cohesion (9):** The report is exceptionally well-organized and cohesive. The information flows smoothly from one paragraph to the next, with clear transitions and logical connections between ideas. The use of paragraphs is skillful and enhances the overall clarity and readability of the report.

**Lexical Resource (9):** The report demonstrates a wide range of vocabulary, using precise and sophisticated language to describe the trends and patterns in the data. The choice of words is appropriate and effective, contributing to the overall clarity and impact of the report.

**Grammatical Range & Accuracy (9):** The report exhibits a high level of grammatical accuracy and fluency. A wide range of grammatical structures is used correctly and appropriately, demonstrating a strong command of English grammar.

## **Model Answer #4**

### **Response:**

The graph indicates the average amount of money (in euros) that four distinct mobile phone companies charged per month between January and September 2002.

As can be seen, Sim TX had the fastest-growing service fee, although Domo largely led in prices. Lex slightly raised the charge, while Alpha generally stabilized its service cost.

Domo offered the most expensive monthly contracts, ranging from 15 to 25 euros, with the peak observed in July. Sim TX, however, was the business that provided the cheapest service for the first six months at about 5 euros. Only in July did it equal Alpha at 10 euros, and in September it exceeded the leading firm, Domo, at 25 euros, a fivefold increase compared to its initial fee.

Like Domo and Sim TX, Lex also charged more over time, but the increase was relatively small (7 euros) compared with the previous companies. In contrast, Alpha's cost was quite stable, except for a slight rise of 4 euros between May and June, after which the amount returned to its normal level of around 10 euros per month.

### **Evaluation:**

#### **Overall Band Score: 9**

**Task Response (9):** The report provides a comprehensive and accurate overview of the data presented in the chart. All key features are identified and discussed in detail.

**Coherence & Cohesion (9):** The report is well-structured and logically organized. The information flows smoothly from one paragraph to the next, with clear transitions and cohesive devices.

**Lexical Resource (9):** The report demonstrates a wide range of vocabulary, including precise and sophisticated terms. The language is accurate and appropriate for the task.

**Grammatical Range & Accuracy (9):** The report exhibits a high level of grammatical accuracy and fluency. A variety of grammatical structures are used correctly and effectively.
