

Task 1: Table

Subject: The following table shows the number of people from five European nations living in each other's countries in 2011.

Where they live	Number of people living in each other's country					Total
	British	Germany	Italian	Polish	Spanish	
British		297,000	119,000	550,000	71,000	1,037,000
Germany	104,000		556,000	426,000	112,000	1,198,000
Italian	79,000	42,000		106,000	19,000	196,000
Polish	760	4,400	670		170	6,000
Spanish	391,000	196,000	188,000	86,000		861,000
Total	524,760	539,000	863,670	1,168,000	202,170	3,298,000

Model Answer #1

Response:

The table illustrates the number of people migrating between different countries in Europe in 2011, specifically focusing on British, German, Italian, Polish, and Spanish citizens.

Overall, the total number of migrants across all countries is 3,298,000. Among these, the majority migrated to Germany, which received 1,198,000 migrants, while only a small number, 6,000, moved to Poland. In contrast, Poland had the highest number of outgoing migrants, totaling 1,168,000, compared to only 202,170 migrants who left Spain.

In detail, Germany received the most migrants from other nations, totaling 1,198,000. Meanwhile, the residents of Germany primarily migrated to Britain, with 297 migrants moving there; in total, 539,000 people migrated from Germany to other countries. The British had the second largest number of outgoing migrants, totaling 1,037,000. Most British people settled in Spain, with 391,000 migrants. In contrast, Spain saw over 861,000 migrants coming from other nations, but very few Spanish citizens—only 202,170—chose to move abroad.

Conversely, Spain was the least favored destination for migration, with just over 6,000 incoming migrants. The Polish had the highest outbound migration, totalling 1,168,000. Similarly, Italy was the second least favourable country for migration, with only 196,000 migrants in 2011, while over 863,670 Italians relocated to other nations.

Evaluation:

Overall Band Score: 9

Task Response (9): Excellent response to the task. All key features of the table are described accurately and completely.

Coherence & Cohesion (9): The report is exceptionally well-organized and easy to follow. The flow of information is natural and logical.

Lexical Resource (8.5): A wide range of sophisticated vocabulary is used accurately and appropriately. The language is precise and effective.

Grammatical Range & Accuracy (9): The grammar is flawless. A wide range of grammatical structures is used with complete accuracy and fluency.

Model Answer #2

Response:

The table presents data on the number of foreigners from five European countries residing in each other's nations in 2011.

Overall, Germany recorded the highest number of emigrants compared to Poland. However, the total number of Polish immigrants across these five countries was the highest, while Spain had the fewest.

According to the table, there were 1,198,000 residents from the other four countries choosing to live in Germany, including approximately 556,000 Italians. Similarly, the United Kingdom ranked second in terms of the total number of foreigners residing there, with 1,037,000. Following that was Spain, with 861,000 immigrants. Notably, these three countries also have the lowest number of immigrants in the following order: Spain (202,170), the United Kingdom (524,760), and Germany (539,000).

In contrast to these three countries, Poland and Italy attracted very few foreigners wishing to settle. There were only 6,000 foreigners living in Poland and 196,000 in Italy. Nevertheless, Poland had the largest number of migrants overall, with 1,168,000 people, closely followed by Italy with 863,670 people.

Evaluation:

Overall Band Score: 9

Task Response (9): The report provides a comprehensive and accurate overview of the data presented in the table.

Coherence & Cohesion (9): The report is well-structured and logically organized, with clear transitions between paragraphs and ideas.

Lexical Resource (8.5): The report demonstrates a wide range of vocabulary, using precise and sophisticated language to describe the data.

Grammatical Range & Accuracy (9): The report is grammatically flawless, with a wide range of complex sentence structures used accurately and effectively.
